

AIG QuickON Utility Release Notes

Version: v1.2.0	Build: 202510071624
Release Date: Oct 21, 2025	

Applicable Products

AIG-101 Series, AIG-301 Series, AIG-302 Series, AIG-501 Series, AIG-502 Series

Supported Operating Systems

Windows 10

New Features

- Adds support for AIG-301, AIG-501, and AIG-502 Series (AIG QuickON now supports the entire AIG product line).
- Adds AWS IoT Core to the Cloud Enrollment session for provisioning plan creation (AIG-301 and AIG-501).

Enhancements

- During the Unlock action, you can include a message informing the user to "change the default SSH password when the device is used for the first time".
This feature complies with the EN 18031 EU RED cybersecurity requirements adopted by the AIG Series products.

Bugs Fixed

N/A

Changes

- Reorders the Security session to appear after the Linux Command session when creating a provisioning plan.
- Return code messages will be fully recorded in the QuickON system log instead of being displayed on the web GUI.
The QuickON Log is located at: C:\Program Files\Moxa\AIG QuickON\Log.

Notes

- The automatic upgrade process uses the second digit of the AIG three-part version number as the main criterion to proceed with upgrades until the latest version is reached.
 - The firmware version format will consist of three digits: x.y.z.
 - x: Major version; fundamental changes
 - y: Minor version; new or modified functions, bug fixes, and security patches
Upgrade rule: Allowed only when upgrading from y? y+1 with z reset to (z=0).
E.g., v2.0.3 > v2.1.0
 - z: Patch version; Only bug fixes and security patches
Upgrade rule: Patch versions can be skipped during upgrades.
E.g., v1.0.1 ? v1.0.5
3. If the default console password has been modified, please restore the device to factory default before using QuickON for provisioning.
This is required for security purposes and to ensure an optimal user experience with QuickON.

Version: v1.1.2	Build: N/A
Release Date: Nov 14, 2024
