Bugs Fixed

- Fixed an issue where provisioning sessions with AIG were not properly revoked after provisioning was completed.

Changes

- Version 1.2.0 cannot be upgraded via the Auto Upgrade feature due to the lack of .NET 8.0 runtime support. Version 1.2.1 now includes a prebuilt .NET 8.0 Runtime.

We recommend either uninstalling v1.2.0 and installing v1.2.1, or manually installing the .NET 8.0 Runtime from the official Microsoft website: <https://dotnet.microsoft.com/en-us/download/dotnet/8.0>
