Firmware for AIG-101 Series Release Notes

Version: v1.3.2	Build: N/A
Release Date: Oct 30, 2026	

Applicable Products

AIG-101 Series

Supported Operating Systems

Moxa Industrial Linux 1 (Debian 9)

New Features

N/A

Enhancements

• To enhance security, the HTTPS server certificate is now generated for each device and is unique as opposed to one certificate for all devices.

Bugs Fixed

• An issue where the Tag Data Processing web page is not working.

Changes

N/A

Notes

• This patch applies to AIG-101 with firmware v1.3.0.
• To upgrade to the patch, do the following:
a. Download the *.deb file from the Moxa official website.
b. Log in to the AIG-101 web console with admin permissions and go to General Operation > Software Upgrade.
c. Select "Upgrade From the Local Drive" and select the *.deb file you downloaded.
d. If the software upgrade snapshot function is disabled, reboot the device.
e. Confirm the firmware version is v1.3.2 on the Dashboard page.
