Bugs Fixed

- DE-2XX and DE-3XX Series cannot be found when searched for if there are four or more devices.
- The NPort device cannot be found using utility via a wireless network adapter under Windows Vista/7.
- The driver causes system BSOD by writing to an invalid memory location under Windows 2008 64-bit.
- The application will not work properly when logged in with a standard user in a Windows Vista/7 environment. This version will prompt the user to change to an account with admin privileges.
