Product Discontinuance Notification—PDN# 0000445504
June 24, 2026

Dear Valued Customer,

We would like to inform you that the NPort 6000 and CN2500/CN2600 will reach its End of Life (EoL) phase, starting May 01, 2026.

This transition is driven by two critical priorities:

1. Futureproof Cybersecurity Resilience: As global security standards intensify, legacy hardware faces inherent limitations in addressing modern cyberthreats. The NPort 6000-G2 is IEC 62443-4-2 SL2 certified, providing the robust, hardware-level security required for today's mission critical networks and performance that's ready for future upgrades.

2. Long-term Supply Sustainability: To uphold our commitment to long-term availability, we are migrating to new G2 platforms with more sustainable component life cycles. This move mitigates the risks associated with aging key components and ensures a stable supply for your future expansions.

If you need any of these products for an existing project, please contact your Moxa sales representative to place orders before the last-buy date of March 31, 2027. Also, please note that last-buy orders may be subject to availability.

The End of Service (EoS) date will be March 31, 2033. Following this date, all support services—including technical assistance, new software upgrades, and new security fixes—will no longer be available. Hardware warranty, repair, and replacement services remain subject to the standard warranty policy for these products.

Please review the details below to determine how these discontinuances will affect your products and/or operations.

Which products will be EoL?

The following products will be EoL. Also, see the models recommended to replace the soon to-be-EoL models, as well as when the replacement models will be available for order.

EOL	Recommended Replacement	Available for Order
NPort 6150	NPort 6150-G2	Available now
NPort 6250	NPort 6250-G2
