1. Understanding the Command Line Interface

This chapter explains how to access the command line interface. In addition, this chapter will help you better understand the interface and the general concepts necessary to manage the device using commands.

Accessing the AWK

Users can connect to the AWK's command line interface using one of two methods: through the serial console or through Telnet/SSH.

Logging in Using the RS-232 Console

The Moxa AWK features an RJ45 serial console port to allow users to connect to the AWK and configure settings.

NOTE

The device has one RS-232 (8-pin RJ45) console port. Use either an RJ45-to-DB9 or RJ45-to-DB25 cable to connect the device's console port to your PC's COM port. If necessary, users can purchase the appropriate cable from Moxa (model number: CBL-RJ45F9-150, CBL-RJ45F25-150).

Pin definition:

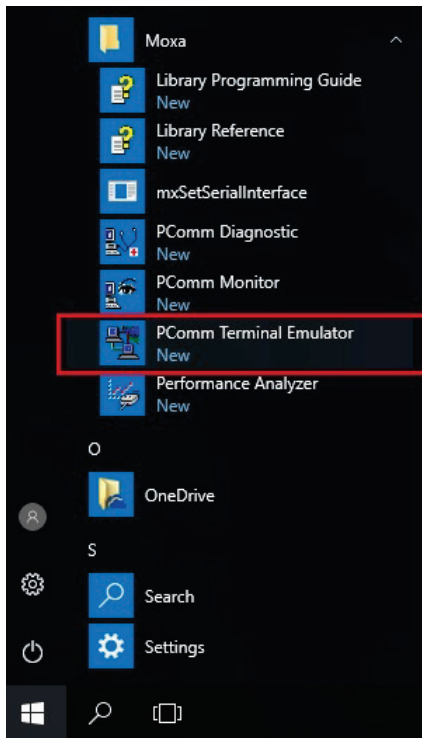

Pin	Description
1	DSR
2	NC
3	GND
4	TXD
5	RXD
6	NC
7	NC
8	DTR

NOTE

Moxa recommends using PComm Terminal Emulator for serial communication. This software is available for free on the Moxa website. You can use other serial communication software, although the process may be different from the instructions provided below.

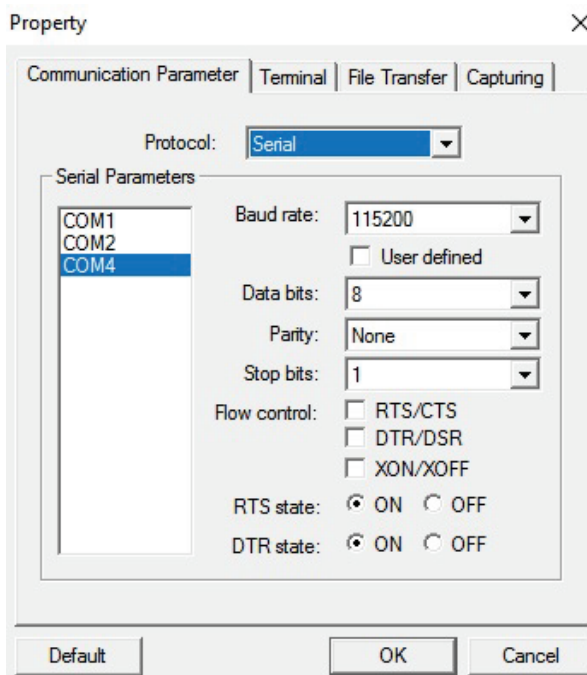

1. Connect the RJ45 end of the included serial cable to the console port on the AWK, and the other end to the serial port on the computer.
2. Download **PComm Terminal Emulator** from the Moxa website and install the software.
3. In Windows, click **Start > Moxa > PComm Terminal Emulator**.

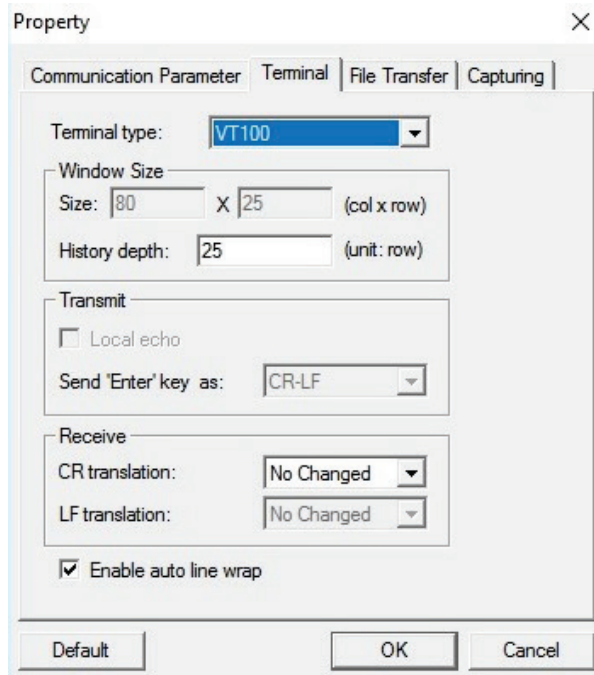

4. Click **Port Manager > Open** to establish a new connection. The Property window will appear.

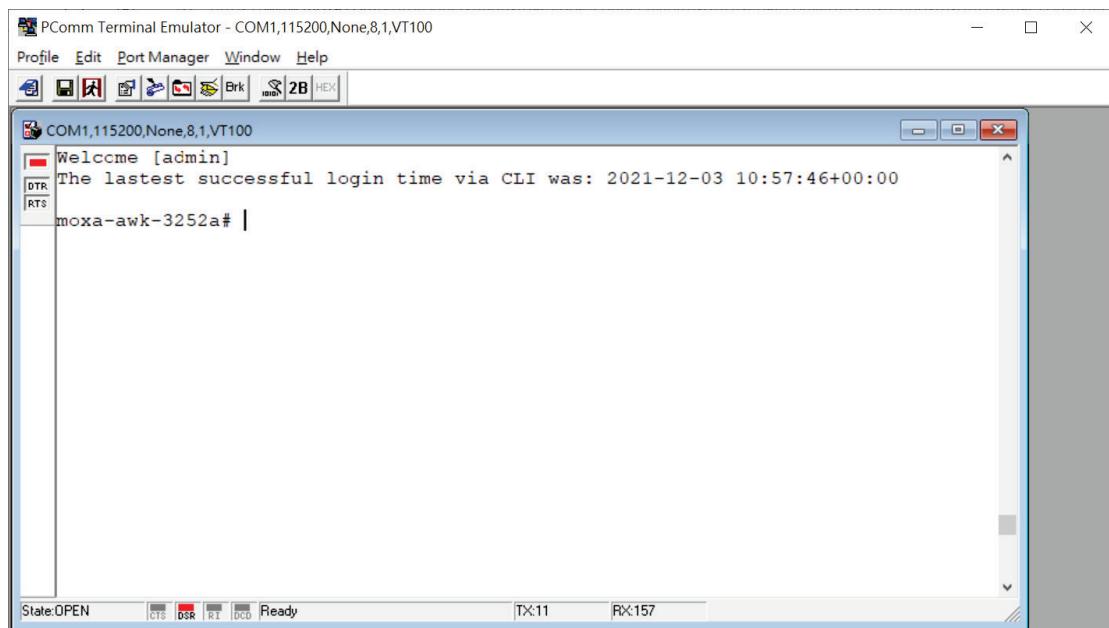

5. On the **Communication Parameter** tab, select the COM port that will be used for the console connection. Configure the fields as follows:
Baud rate: 115200
Data bits: 8
Parity: None
Stop bits: 1

- On the **Terminal** tab, select **VT100** as the **Terminal Type**, and click **OK** to continue.

- Log in to the console using your account name and password. For security reasons, there is no default username and password. If this is the first time logging in, you will be prompted to create a username and password.

- When successfully connected to the AWK, you can start configuring the AWK parameters using command line instructions.

Logging in Using SSH

NOTE

Before accessing and configuring the AWK device via SSH, a user account must be created in the web interface.

Opening the Moxa AWK's Telnet or web console over a network requires that the PC host and Moxa AWK are on the same logical subnet. You may need to adjust your PC host's IP address and subnet mask. By default, the Moxa AWK's IP address is **192.168.127.253** and the subnet mask is **255.255.255.0**. Your PC's IP address must be configured with an IP of the form 192.168.127.xxx and a subnet mask of 255.255.255.0.

NOTE

When connecting to the Moxa AWK through Telnet or the web console, first connect one of the Moxa AWK's Ethernet ports to an Ethernet LAN switch, or directly to your PC's Ethernet port. You may use either a straight-through or cross-over Ethernet cable.

NOTE

The Moxa AWK's default IP address is 192.168.127.253 with subnet mask of 255.255.255.0.

After making sure that the Moxa AWK is connected to the same LAN and logical subnet as your PC, open the Moxa AWK's CLI console as follows:

1. Enter the device's IP address into the Telnet tool and set the connection type to **SSH**. You may use any Telnet tool, in this case, we are using PuTTY.

2. Click **Open** to initiate a Telnet connection to the device and open the CLI login page
3. Log in to the console using your account name and password. For security reasons, there is no default username and password. If this is the first time logging in, you will be prompted to create a username and password. In the example below, we log in using the custom account "admin".

```
login as: admin
Pre-authentication banner message from server:

End of banner message from server
Keyboard-interactive authentication prompts from server:
Password: █
```

4. When successfully connected to the AWK, you can start configuring the AWK parameters by using command line instructions.

Command Modes

Basic Configuration

The CLI (Command Line Interface) for Moxa's Managed AWK can be accessed through either the serial console or the Telnet console. For either type of connection, access to the CLI is generally referred to as a Basic session.

The CLI is organized using different configuration levels. When you first enter the CLI, type "?" to view a list of basic commands and a description of each function. Type any of the commands shown on the screen to access the next configuration level. The help panel can be accessed from any configuration level by typing "?". The AWK will show all the commands for the current configuration mode.

```
moxa-awk-3252a# ?
clear          Perform a clear action.
cli           Configure CLI display parameters.
configure     Enter configuration mode.
copy         Perform a copy action.
diag        Perform system diagnostics.
end         Exit configure mode
exit       Exit the session
help      Show the available options for the entered
         command.
list     List the folders and files on the external
         storage.
logout  Terminate the session
password Change the account password.
ping   Ping the target host.
relay  Show and set the relay state.
reload Perform a warm restart or reset to factory default
         settings.
show   Show Show the current settings and device status.
unlock Unlock the user.
username Configure user session
```

Understanding the Command Modes

The CLI is organized in three configuration tiers:

Basic Mode: On the basic level, you can retrieve the device configuration, status, and logs. In addition, you can perform several basic actions (e.g., locate the device).

Configuration Mode: Configuration mode allows you to configure device parameters and functions.

Specific Command Modes: Some functions have additional parameters that can only be configured through a function-specific command mode. Any changes made in this mode will only apply to that specific function. Examples of specific command modes include ssid-ap, ssid-client, config-if, fw-l2, fw-l3, config-vlan, and config-nat.

NOTE

In the specific command modes (e.g., ssid-ap, config-nat), commands will not apply immediately, but will only be applied after executing the "exit" or "end" command.

Mode	Access Method	Prompt	Exit Method	About This Mode
Basic	The default mode after successfully logging in.	moxa#	Enter the exit command to terminate the telnet session.	Use this mode to verify commands that you have entered.
Configuration	Enter the configure command while in Basic mode.	moxa (config)#	Enter the exit command to return to the previous configuration mode.	Use this mode to configure parameters that will apply to the entire AWK.
Specific Command Modes	Dependent on the command (outlined in corresponding sections below).	moxa (config-if)#	Enter the exit command to apply changes made and return to the previous configuration mode.	Use this mode to configure parameters for a specified interface, function, or feature group.

Refer to the following example to see how to change configuration modes.

Type **configure** at the command prompt to enter configuration mode.

```
moxa-awk-3252a# configure
moxa-awk-3252a (config) #
```

Type **exit** to return to the previous configuration mode.

```
moxa-awk-3252a (config) # exit
moxa-awk-3252a#
```

Help Messages

The CLI supports several types of interactive commands. The **Help** commands are listed in the following table:

Command	Purpose
?	Shows a brief description of the Help feature in any command level.
Partial command?	Shows a list of commands that begin with the entered character. There should be no space between the command and the question mark.
Partial command<Tab>	Completes a partially entered command name along with its following syntax argument. There should be no space between the command and <Tab>.
Command ?	Shows a list of arguments that can complete the entered partial command. There should be a space between the command and the question mark.
Help	Displays a complete list with all usable commands in the current command level with syntax and argument information.

The "?" command will show all the available commands in the current command level. Use the Up and Down keyboard keys to scroll up and down the command list. Press Q to go to the end of the list and return to the command line prompt.

```

moxa-awk-3252a(config)# ?

clear                Perform a screen clear.
clock                Configure system clock settings.
config               Enable or disable Automatic Configuration Backups/Restore.
end                  Exit configure mode
event-notification   Configure event notification settings.
exit                 Exit to the privileged Exec mode
fail-safe            Configure Fail-Safe password settings.
firewall             Configure firewall settings.
help                 Show the available options for the entered command.
hw-if                Configure the hardware interface settings.
interface            Configure network interface settings.
ip                   Configure device network settings.
lldp                 Configure LLDP settings.
logging              Configure event log settings.
no                   Reset settings to their default values.
ntp                  Configure NTP settings.
password             Configure password max-life-time
sys-info             Configure system information.
user-iface           Configure user interface settings.
username             Configure user authority
vlan                 Configure VLAN settings
wlan                 Configure Wi-Fi parameters.

```

```

moxa# help
EXEC commands :
  clear logging event-log
  clear screen
  cli pagination turn {on | off}
  configure [ terminal ]
  ...

```

If you want to narrow down the list of commands to a specific category, add the command prefix after the "help" string. In the following example, we narrow the command list down to "show" commands by adding the "show" prefix to the "help" command.

```

moxa-awk-3252a# help show
EXEC commands :

  show clock
  [Desc]: Show system clock settings.
  show config
  [Desc]: Show Automatic Configuration Backups/Restores settings.
  show device-firmware
  [Desc]: Show the current running and uploaded firmware version.
  show event-notification email-notification
  [Desc]: Show email notification settings.
  show event-notification snmp-trap
  [Desc]: Show SNMP trap Settings
  show event-notification {all | system-event | wifi-event | network-event}
  [Desc]: Show the event and its action
  show firewall l2-policy
  [Desc]: Show the Layer 2 firewall policy settings.
  show firewall l3-policy
  [Desc]: Show the Layer 3 firewall policy settings.
  show history
  [Desc]: Display command list history.
--More--

```

Special Usage and Limitations

If the command contains any special characters, such as *, #, and %, the special characters should be enclosed in quotation marks (""). Refer to the example below.

```
moxa-awk-3252a(config)# ip nat new
You will create a new NAT rule with priority 1.
moxa-awk-3252a(config-nat)# name "IPcam3#"
moxa-awk-3252a(config-nat)#
```

Universal Commands

Universal commands are commands that can be used in multiple configuration modes. Refer to the table below for an overview of universal commands.

Command	Description
# no	All configuration modes support the "no" command, except for basic mode. Privilege requirement: Depends on the command. Refer to the Account Privilege and Authority section for more information.
# show	All configuration modes support the "show" command. Privilege requirement: Depends on the command. Refer to the Account Privilege and Authority section for more information.
# help [command]	All configuration modes support the "help" command.
# clear screen	All configuration modes support the "clear screen" command.
# end	All configuration modes support the "end" command. Executing this command will exit the current mode and return to the Basic configuration mode.
# exit	All configuration modes support the "exit" command. Executing this command will exit the current mode and return to the previous configuration mode level.
# abort	This command is used to leave the current command mode without making any configuration changes and return to the previous configuration mode level.
# show history	Show the command list history.

Account Privilege and Authority

For security purposes, users are separated based on roles, each with different access rights. The AWK supports 4 types of account roles: Admin, Engineer, User, and Custom.

In order to perform certain configurations, the administrator needs to confirm that the user account performing these tasks has the necessary privileges and rights. Refer to the table below for an overview of each role and corresponding privileges.

	Admin	Engineer	User	Custom
Account Privileges	O	X	X	User-defined
Account System	O	O	X	User-defined
Auditor System	O	O	X	User-defined
Advanced Diagnostics	O	O	X	User-defined
Diagnostics	O	O	O	User-defined
Network Configurations	O	O	X	User-defined
Status Monitoring	O	O	O	User-defined
System Backup	O	X	X	User-defined
System Management	O	O	X	User-defined

No and Default Forms of Commands

The “no” command can be used to perform the “delete”, “disable”, or “reset to default” functions. Type “no ?” to see how the command can be used.

CLI Error Messages

You may encounter some error messages while configuring Moxa’s AWK Series device. Refer to the following table for an overview of error messages and solutions.

Error Message	Meaning	Solution
% Ambiguous command	The characters you entered are insufficient for the AWK to recognize the command.	Re-enter the command with a space between the command and the question mark (?). A list of all possible keywords with the command will appear.
% Incomplete command	The keywords or values you entered are incomplete.	Re-enter the command with a space between the command and the question mark (?). A list of all possible keywords with the command will appear.
% Invalid input detected at '^' marker.	The command you entered is incorrect. The point of invalid input will be indicated by a caret (^).	Enter a question mark (?) to display all the available commands in this command mode. A list of all possible keywords with the command will appear.

Command History

Use the Up arrow and Down arrow keys to cycle through the history of previously entered commands.

Pressing the Up arrow will display the previously entered command. Pressing the Down arrow will display the next command in the history.

Users can connect to the AWK’s command line interface using one of two methods: through the serial console or through Telnet/SSH.

2. Commands

This chapter covers all available commands to configure the Moxa AWK.

System

System Management

Firmware Upgrade

Upgrade the Firmware

Commands

copy {tftp://<server>/<filename> | sftp ://<account>:<password>@<server>/<pathname> | abc-02:<pathname> | <fw_version (v.- Build ----_----_----)>} **device-firmware upgrade**

Syntax Description	copy	Perform a copy action.
	<source>	Specify the source.
	device-firmware	Upload or upgrade the device firmware.
	upgrade	Upgrade the firmware.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# copy tftp://192.168.127.1/FWR_AWK-3252A_v0.1_20030415.rom device-firmware upgrade	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Show the Firmware Version

Commands

show device-firmware

Syntax Description	show	Show the current settings and device status.
	device-firmware	Show the current running and uploaded firmware version.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show device-firmware	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configuration Backup and Restore

Back Up the Running Configuration

Commands

copy running-cfg <storage-location>

Syntax Description	copy	Perform a copy action.
	running-cfg	The current operating configuration.
	<storage-location>	Specify the storage location.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Storage location: {tftp://<server> sftp ://<account>:<password>@<server>/<folder> abc-02}	
Examples	moxa# copy running-cfg abc-02	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Backup	

Back Up the Startup Configuration

Commands

copy startup-cfg <storage-location>

Syntax Description	copy	Perform a copy action.
	startup-cfg	The system startup configuration.
	<storage-location>	Specify the storage location.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Storage location: {tftp://<server> sftp ://<account>:<password>@<server>/<folder> abc-02}	
Examples	moxa# copy running-cfg tftp://192.168.127.1/config.ini	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Backup	

Restore the Startup Configuration

Commands

copy <storage-location> **startup-cfg**

Syntax Description	copy	Perform a copy action.
	<storage-location>	Specify the storage location.
	startup-cfg	The system startup configuration.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Storage location: {tftp://<server> sftp ://<account>:<password>@<server>/<folder> abc-02}	
Examples	moxa# copy tftp://192.168.127.1/config.ini startup-cfg	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Backup	

Apply the Running Configuration to the Startup Configuration

Commands

copy running-cfg startup-cfg

Syntax Description	copy	Perform a copy action.
	running-cfg	The current operating configuration.
	startup-cfg	The system startup configuration.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# copy running-cfg startup-cfg	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Enable/Disable Automatic Configuration Backup to ABC-02

Commands

config auto-backup {enabled | disabled}

Syntax Description	config	Enable or disable Automatic Configuration Backups/Restore.
	auto-backup	Automatically back up configurations to the ABC-02.
	enabled	Enable automatic configuration backups.
	disabled	Disable automatic configuration backups.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# config auto-backup enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Backup	

Enable/Disable Automatic Configuration Restoration

Commands

config auto-restore {enabled | disabled}

Syntax Description	config	Enable or disable Automatic Configuration Backup/Restore.
	auto-restore	Automatically restore configurations from the ABC-02.
	enabled	Enable automatic configuration restores.
	disabled	Disable automatic configuration restores.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# config auto-restore enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Backup	

Show the Automatic Configuration Backup/Restoration Settings

Commands

show config

Syntax Description	show	Show the current settings and device status.
	config	Show automatic configuration backups/restores settings.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show config	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Backup	

Reset to Factory Default Configuration

Commands

reload factory-default [keep {log}]

Syntax Description	reload	Perform a warm restart or reset to factory default settings.
	factory-default	Reset to factory default settings.
	keep	Keep the specified item(s) when resetting to factory default settings.
	log	The system event logs.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# reload factory-default keep log	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Account Management

Create a User Account

Commands

username <username (len: 4-32)> [**password**] [**role** {admin | engr | user | custom}] [**status** {enabled | disabled}] [**email** <email (max len: 63)>]

Syntax Description	username	Create an account or configure user settings for this account.
	<username>	Specify the username of the account (4-32 characters).
	password	Configure the password of this account.
	role	Configure the authority of this account.
	{admin engr user custom}	Set the authority of this account to Admin, Engineer, User, or Custom.
	status	Enable or disable this user account.
	{enabled disabled}	Specify to enable or disable this user account.
email	Configure the email of this account.	
	<email (max len: 63)>	Specify the email of this account (max. 63 characters).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# username Forky role admin	
	(config)# username Forky password	
	(config)# username Forky status enabled	
	(config)# username Forky email forky@abc.com	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Account System	

Remove an Account

Commands

no username <username>

Syntax Description	no	Reset settings to their default values.
	username	Delete the user account.
	<username>	Specify the username of the account (4-32 characters).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# no username Forky	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Account System	

Enable User Privileges for Custom Authority

Commands

username <username> **custom-authority** [account] [adv-diag] [auditor] [diag] [net-cfg] [status-monitoring] [sys-backup] [sys-mgmt]

Syntax Description	username	Create an account or configure user settings for this account.
	<username>	Specify the username of the account (4-32 characters).
	custom-authority	Enable authorities for this account.
	account	Enable Account System authority for this account.
	adv-diag	Enable Advanced Diagnostics authority for this account.
	auditor	Enable Auditor System authority for this account.
	diag	Enable Diagnostics authority for this account.
	net-cfg	Enable Network Configuration authority for this account.
	status-monitoring	Enable Status Monitoring authority for this account.
	sys-backup	Enable System Backup authority for this account.
sys-mgmt	Enable System Backup authority for this account.	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# username Forky custom-authority account sys-mgmt	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Account System	

Disable User Privileges for Custom Authority

Commands

no username <username> **custom-authority** [account] [adv-diag] [auditor] [diag] [net-cfg] [status-monitoring] [sys-backup] [sys-mgmt]

Syntax Description	no	Reset settings to their default values.
	username	Create an account or configure user settings for this account.
	<username>	Specify the username of the account (4-32 characters).
	custom-authority	Disable authorities for this account.
	account	Disable Account System authority for this account.
	adv-diag	Disable Advanced Diagnostics authority for this account.
	auditor	Disable Auditor System authority for this account.
	diag	Disable Diagnostics authority for this account.
	net-cfg	Disable Network Configuration authority for this account.
	status-monitoring	Disable Status Monitoring authority for this account.
sys-backup	Disable System Backup authority for this account.	
sys-mgmt	Disable System Backup authority for this account.	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# no username Forky account	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Account System	

Show the Account Settings

Commands

show username config

Syntax Description	show	Show the current settings and device status.
	username	Show the account status or settings.
	config	Show the account settings.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show username config	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Account System	

Change the Account Password

Commands

Password

Syntax Description	password	Change the account password.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# password	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Basic	

Management Interface

Hardware Interface

Enable/Disable the USB Interface

Commands

hw-if usb {enabled | disabled}

Syntax Description	hw-if	Configure the hardware interface settings.
	usb	Enable or disable the USB interface.
	enable	Enable the USB interface.
	disable	Disable the USB interface.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# hw-if usb enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Show the Hardware Configuration

Commands

show hw-if

Syntax Description	show	Show the current settings and device status.
	hw-if	Show the hardware interface settings.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show hw-if	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

List the Folders and Files on the ABC-02

Commands

list abc-02

Syntax Description	list	List the folders and files on the external storage.
	abc-02	List the folders and files on the ABC-02.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# list abc-02	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Enable/Disable the Reset Button

Commands

hw-if reset-button {enabled |disabled [**active-duration** <active-duration (0-180 sec)>]}

Syntax Description	hw-if	Configure the hardware interface settings.
	reset-button	Configure the reset button settings.
	enabled	Set the reset button to always be enabled.
	disabled	The reset button will remain active for the specified "active duration", after which it will be disabled.
	active-duration	Configure the duration the reset button will be active for.
	<active-duration>	Specify the active duration. If the reset button is disabled and the duration is set to 0, the reset will be disabled immediately (0-180 sec).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# hw-if reset-button enabled active-duration 120	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Reset the Reset Button Configuration Settings

Commands

no hw-if reset-button

Syntax Description	no	Reset settings to their default values.
	hw-if	Reset the hardware interface settings.
	reset-button	Reset the reset button configuration settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# no hw-if reset-button	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Enable/Disable the Serial Port

Commands

hw-if serial-console {enabled | disabled}

Syntax Description	hw-if	Configure the hardware interface settings.
	serial-console	Enable or disable the serial port.
	enabled	Enable the serial port.
	disabled	Disable the serial port.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# hw-if serial-console disabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Show the Hardware Interface Settings

Commands

show hw-if

Syntax Description	show	Show all modified settings.
	hw-if	Show the hardware interface settings.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show hw-if	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

User Interface

Configure SNMP Access Settings

Commands

user-iface snmp status {read-write | read-only | disabled}

Syntax Description	user-iface	Configure user interface settings.
	snmp	Configure SNMP settings.
	status	Configure SNMP status settings.
	read-write	Enable SNMP with Read/Write privilege.
	read-only	Enable SNMP with Read-only privilege.
	disable	Disable SNMP.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# user-iface snmp status read-only	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the Access TCP/UDP Port of the User Interfaces

Commands

user-iface {http | https | telnet | ssh | snmp} **port** <port-number (1-65535)>

Syntax Description	user-iface	Configure user interface settings.
	http	Configure HTTP settings.
	https	Configure HTTPS settings.
	telnet	Configure Telnet settings.
	ssh	Configure SSH settings.
	snmp	Configure SNMP settings.
	port	Configure the access TCP/UDP port of the user interface.
	<port-number>	Specify the access TCP/UDP port of the user interface (1-65535).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# user-iface https port 443	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the Maximum Number of Concurrent Sessions for HTTP and HTTPS

Commands

user-iface http max-session <session-number (1-10)>

Syntax Description	user-iface	Configure user interface settings.
	http	Configure HTTP settings.
	max-session	Configure the maximum number of concurrent sessions for HTTP and HTTPS.
	<session-number>	Specify the maximum number of concurrent sessions (1-10).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# user-iface http max-session 2	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the Maximum Number of Concurrent Sessions for the Serial Console, Telnet, and SSH

Commands

user-iface terminal max-session <session-number (1-10)>

Syntax Description	user-iface	Configure user interface settings.
	terminal	Configure CLI settings.
	max-session	Configure the maximum number of concurrent sessions for HTTP and HTTPS.
	<session-number>	Specify the maximum number of concurrent sessions (1-10).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# user-iface terminal max-session 2	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Time

Configure the Clock Synchronization Source

Commands

clock source {internal-clock | ntp}

Syntax Description	clock	Configure system clock settings.
	source	Specify the clock synchronization source.
	internal-clock	Set the clock synchronization source to the system's internal clock.
	ntp	Set the clock synchronization source to NTP.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# clock source internal-clock	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure System Internal Clock Settings

Commands

clock set <time (hh:mm:ss)> [{<month (1-12)> | jan | feb | mar | apr | may | jun | jul | aug | sep | oct | nov | dec }] [<date (1-31)>] [<year (2000-2037)>]

Syntax Description	clock	Configure system clock settings.
	set	Set the system time.
	<time>	Set the time (hh:mm:ss).
	<month>	Specify the month by integer (1-12).
	<date>	Set the date (1-31).
	<year>	Set the year (2000-2037).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# clock set 11:11:11 12 31 2022	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure NTP Server Settings

Commands

ntp remote-server ntp <server-index (1-2)> <server-address (max len: 60)>"

Syntax Description	ntp	Configure NTP settings.
	remote-server	Configure NTP server settings.
	ntp	Configure NTP server settings.
	<server-index>	Specify the index of the NTP server (1-2).
	<server-address>	Specify the NTP server address (max. 60 characters).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ntp remote-server ntp 1 pool.ntp.org	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure NTP Server Synchronization Interval

Commands

ntp sync-interval <sync-interval (10-1440 min)>

Syntax Description	ntp	Configure NTP settings.
	sync-interval	Configure the NTP sync interval.
	<sync-interval>	Specify the NTP sync interval (10-1440 min).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ntp sync-interval 150	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure Time Zone Settings

Commands

clock timezone {"-12" | "-11" | "-10" | "-9:30" | "-9" | "-8" | "-7" | "-6" | "-5" | "-4" | "-3:30" | "-3" | "-2" | "-1" | "0" | "1" | "2" | "3" | "3:30" | "4" | "4:30" | "5" | "5:30" | "5:45" | "6" | "6:30" | "7" | "8" | "8:30" | "8:45" | "9" | "9:30" | "10" | "10:30" | "11" | "12" | "12:45" | "13" | "14"}

Syntax Description	clock	Configure system clock settings.
	timezone	Configure time zone settings.
	<timezone -12 ~ +14>	Set the integer -12 to +14 to define UTC -12 to UTC +14 correspondingly, or set special time zone such as 5:45 for time zone UTC+05:45.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# clock timezone -8	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure Fast Boot-up

Commands

fastboot {enabled | disabled}

Syntax Description	fastboot	Configure fast boot-up settings.
	{enabled disabled}	Specify to enable or disable fast boot-up. Default disabled.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# fastboot enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure System Information

Configure the Device Name

Commands

sys-info hostname <device-name (len: 1-255)>

Syntax Description	sys-info	Configure system information.
	hostname	Configure the device name.
	<device-name>	Specify the device name (1-255 characters).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# sys-info hostname "hostname exmpale"	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the Device Location

Commands

sys-info location <location (max len: 255)>

Syntax Description	sys-info	Configure system information.
	location	Configure the device location.
	<location>	Specify the device location (max. 255 characters).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# sys-info location "assembly workstation"	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the Device Description

Commands

sys-info description <description (max len: 255)>

Syntax Description	sys-info	Configure system information.
	description	Configure the device description.
	<description>	Specify the device description (1-255 characters).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# sys-info description "WLAN for assembly automation"	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Network Service

DHCP Server

Set the DHCP Server Mode

Commands

dhcp-server mode {disabled | dhcp-and-static-mapping}

Syntax Description	dhcp-server	Configure DHCP server settings.
	mode	Set the DHCP server mode.
	{disabled dhcp-and-static-mapping}	Disable the DHCP server or enable the DHCP server with static mapping.
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v2.0 and later Only available in AP/Master/Client-Router mode.	
Examples	moxa (config)# dhcp-server mode dhcp-and-static-mapping	
Error Messages	N/A	
Related Commands	moxa (config)# no dhcp-server mode	
Privilege Required	Network	

Configure DHCP Server Settings

Commands

dhcp-server dhcp

Syntax Description	dhcp-server	Configure DHCP server settings.
	dhcp	Enter DHCP configuration level to configure DHCP-related settings.
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v2.0 and later	
Examples	moxa (config)# dhcp-server dhcp moxa (config-dhcp)#	
Error Messages	N/A	
Related Commands	moxa (config-dhcp)# netmask <netmask (ipv4)> moxa (config-dhcp)# gateway <gateway(ipv4)> moxa (config-dhcp)# name-server <server-id (1 - 2)> <dns-server (ipv4)> moxa (config-dhcp)# ntp-server <ntp-server (ipv4)> moxa (config-dhcp)# lease-time <lease-time (2 - 14400)> moxa (config-dhcp)# pool range <start-ip (ipv4)> <end-ip (ipv4)> moxa (config-dhcp)# pool status {enabled disabled}	
Privilege Required	Network	

Configure the DHCP Server Static Mapping

Commands

static-mapping {new | <index (1 - 32)>}

Syntax Description	static-mapping	Configure DHCP server settings.
	mode	Set the DHCP server mode.
	new	Create a new static map entry.
	<index>	Specify an index to modify the corresponding static map entry.
Defaults	N/A	
Command Modes	config-dhcp	
Usage Guidelines	Firmware v2.0 and later	
Examples	moxa (config-dhcp)# static-mapping 1 You are editing DHCP static entry 1.	
Error Messages	N/A	
Related Commands	moxa (dhcp-static)# status {enabled disabled} moxa (dhcp-static)# hostname <hostname> moxa (dhcp-static)# hardware-address <target-mac-address (mac)> moxa (dhcp-static)# assigned-ip <assigned-ip (ipv4)> moxa (dhcp-static)# exit moxa (config-dhcp)# no static-mapping {all <index (1 - 32)>}	
Privilege Required	Network	

Configure DHCPv6

Commands

dhcpv6-ra-server mode {disabled | slaac-rdcss | stateless-dhcpv6 | stateful-dhcpv6 }

Syntax Description	dhcpv6-ra-server mode	Configure built-in DHCPv6 server mode.
	disabled	Disable DHCPv6 server service. Default disabled.
	slaac-rdcss	Enable the RA server.
	stateless-dhcpv6	Enable the DHCPv6/RA server.
	stateful-dhcpv6	Enable the DHCPv6 server.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Only for device operating under AP/Master/Client-Router mode.	
Examples	(config)# dhcpv6-ra-server mode stateless-dhcpv6	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Management	

Reset DHCPv6

Commands

no dhcpv6-ra-server mode

Syntax Description	no	Reset designated feature configuration to default.
	dhcpv6-ra-server mode	Specify to reset the DHCPv6 configuration.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# no dhcpv6-ra-server mode	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Management	

Configure DHCPv6 Lease Time

Commands

lease-time <lease-time (2 - 14400)>

Syntax Description	lease-time	Configure the lease time.
	<lease-time (2 - 14400)>	Specify the lease time (unit: min).
Defaults	N/A	
Command Modes	(config-dhcpv6)	
Usage Guidelines	N/A	
Examples	(config)# dhcpv6-ra-server dhcpv6 (config-dhcpv6)# lease-time 1400	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Management	

Wi-Fi

Wi-Fi Settings

Configure the Wireless Operation Mode

Commands

wlan mode {disabled | ap | client | client-router | master | slave | aeromesh | sniffer {5ghz | 2.4ghz | 2.4-and-5ghz} security {none | tls}}

Syntax Description	wlan	Configure Wi-Fi settings.
	mode	Configure the Wi-Fi operation mode.
	disabled	Disable Wi-Fi.
	ap	Set the device to AP mode.
	client	Set the device to Client mode.
	client-router	Set the device to Client-router mode.
	master	Set the device to Master mode.
	slave	Set the device to Slave mode.
	aeromesh	Set the device to AeroMesh mode.
	sniffer	Set the device to Sniffer mode.
{5ghz 2.4ghz 2.4-and-5ghz}	Specify to sniffer on 5 GHz, 2.4 GHz, or both bands.	
security	Configure the security mode.	
{none tls}	Do not use any security or use TLS security.	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	AeroMesh only supported in firmware v3.0 and later. For AWK-3252A and AWK-4252A Series only.	
Examples	(config)# wlan mode aeromesh (config)# wlan mode sniffer 5ghz security tls	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset the Wireless Operation Mode to Default Settings

Commands

no wlan mode

Syntax Description	no	Reset settings to their default values.
	wlan	Reset Wi-Fi settings.
	mode	Reset the Wi-Fi operation mode.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# no wlan mode	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure SSID Settings

Commands

wlan ap ssid <ssid> {5ghz | 2.4ghz}

Syntax Description	wlan	Configure Wi-Fi settings.
	ap	Configure AP settings.
	ssid	Configure SSID settings by SSID name.
	<ssid>	Specify the SSID name (max. 32 characters).
	{5ghz 2.4ghz}	Assign this SSID to the 5 GHz or 2.4 GHz band.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Besides assigning a SSID, this command will automatically enter the configuration mode for the specified SSID	
Examples	(config)# wlan ap ssid "test ap1" 5ghz	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Enable/Disable the SSID

Commands

status {enabled | disabled}

Syntax Description	status	Configure the SSID status.
	enabled	Enable the SSID.
	disabled	Disable the SSID.
Defaults	N/A	
Command Modes	ssid-ap	
Usage Guidelines	After entering AP configuration mode	
Examples	(config)# wlan ap ssid "test ap1" 5ghz (ssid-ap)# status disabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Delete SSID Settings

Commands

no wlan ap {ssid <ssid> {5ghz | 2.4ghz} | ssid-idx <ssid-index>}

Syntax Description	no	Reset settings to their default values.
	wlan	Configure Wi-Fi settings.
	ap	Configure AP settings.
	ssid	Delete SSID settings by SSID name.
	<ssid>	Specify the SSID name (max. 32 characters).
	{5ghz 2.4ghz}	Delete this SSID from the 5 GHz or 2.4 GHz band.
	ssid-idx	Delete SSID settings by SSID index.
<ssid-index>	Specify the SSID index (1-9).	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# no wlan ap ssid "test ap1" 5ghz (config)# no wlan ap ssid-idx 3	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the SSID List

Commands

wlan ap show ssid

Syntax Description	wlan	Configure Wi-Fi settings.
	ap	Configure AP settings.
	show	Show the current settings and device status.
	ssid	Show the SSID list
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# wlan ap show ssid	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Enter Client Configuration Mode

Commands

wlan client

Syntax Description	wlan	Configure Wi-Fi settings.
	client	Configure Client settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# wlan client	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure AeroMesh Configuration Mode

Commands

wlan aeromesh

Syntax Description	wlan	Configure Wi-Fi settings.
	aeromesh	Configure AeroMesh settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Firmware v3.0 and later. For AWK-3252A and AWK-4252A Series only.	
Examples	(config)# wlan aeromesh	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure a SSID

Commands

ssid <ssid>

Syntax Description	ssid	Configure the SSID name.
	<ssid>	Specify the SSID name (max. 32 characters).
Defaults	N/A	
Command Modes	ssid-ap ssid-client ssid-mesh	
Usage Guidelines	After entering AP, client, or AeroMesh configuration mode.	
Examples	(config)# wlan client (ssid-client)# ssid "test ap1"	

Error Messages	N/A
Related Commands	N/A
Privilege Required	Network Configuration

Configure AeroMesh Mode Settings

Commands

role {portal | node}

Syntax Description	role	Configure the AeroMesh device role settings.
	{portal node}	Set the device as a portal or a node in the AeroMesh network.
Defaults	N/A	
Command Modes	ssid-mesh	
Usage Guidelines	Firmware v3.0 and later. For AWK-3252A and AWK-4252A Series only. Set up after entering AeroMesh configuration mode and SSID settings.	
Examples	(ssid-mesh)# role portal	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show Modified AeroMesh Settings

Commands

show

Syntax Description	show	Show all modified AeroMesh settings before applying.
Defaults	N/A	
Command Modes	ssid-mesh	
Usage Guidelines	Firmware v3.0 and later. For AWK-3252A and AWK-4252A Series only.	
Examples	(ssid-mesh)# show	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset AeroMesh Settings

Commands

no wlan aeromesh

Syntax Description	no	Reset settings to their default values.
	wlan	Reset WLAN settings.
	aeromesh	Reset AeroMesh settings.
Defaults	N/A	
Command Modes	ssid-mesh	
Usage Guidelines	Firmware v3.0 and later. For AWK-3252A and AWK-4252A Series only.	
Examples	(config)# no wlan aeromesh	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the List of Associated Clients for the AeroMesh

Commands

show associated-client-list aeromesh-ssid

Syntax Description	show	Show the current settings and device status.
	associated-client-list	Show the associated client list for the specified SSID.
	aeromesh-ssid	Show the list of clients associated with the AeroMesh SSID.
Defaults	N/A	

Command Modes	ssid-mesh
Usage Guidelines	Firmware v3.0 and later. For AWK-3252A and AWK-4252A Series only.
Examples	moxa# show wlan associated-client-list aeromesh-ssid
Error Messages	N/A
Related Commands	N/A
Privilege Required	Network Configuration

Configure Protected Management Frame Settings

Commands

pmf {disabled | 802.11w}

Syntax Description	pmf	Configure Protected Management Frame settings.
	disabled	Disable the Protected Management Frame.
	802.11w	Enable 802.11w Management Frame security.
Defaults	N/A	
Command Modes	ssid-ap ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-ap)# pmf disabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure SSID Broadcasting Settings

Commands

ssid-broadcast {enabled | disabled}

Syntax Description	ssid-broadcast	Configure SSID broadcasting settings.
	enabled	Enable SSID broadcasting.
	disabled	Disable SSID broadcasting.
Defaults	N/A	
Command Modes	ssid-ap	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan ap ssid "ap-1" 5g moxa (ssid-ap)# ssid-broadcast enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure SSID Security Settings

Commands

security {open | wpa | wpa2 | wpa3 | wpa-wpa2-mixed | wpa2-wpa3-mixed}

Syntax Description	security	Configure security mode settings.
	open	Set the security mode to Open. This is not recommended.
	wpa	Set the security mode to WPA.
	wpa2	Set the security mode to WPA2.
	wpa3	Set the security mode to WPA3.
	wpa-wpa2-mixed	Set the security mode to WPA/WPA2 Mixed.
	wpa2-wpa3-mixed	Set the security mode to WPA2/WA3 Mixed.
Defaults	N/A	
Command Modes	ssid-ap ssid-mesh	
Usage Guidelines	AeroMesh mode only supports the following security methods. wpa2, wpa3, wpa2-wpa3-mixed.	
Examples	moxa (config)# wlan ap ssid "ap-1" 5g moxa (ssid-ap)# security wpa3	

Error Messages	N/A
Related Commands	N/A
Privilege Required	Network Configuration

Configure the AeroMesh Passphrase

Commands

key

Syntax Description	key	Specify the AeroMesh passphrase.
Defaults	N/A	
Command Modes	ssid-mesh	
Usage Guidelines	Firmware v3.0 and later. For AWK-3252A and AWK-4252A Series only. Set up after entering AeroMesh configuration mode and SSID settings.	
Examples	(ssid-mesh)# key Enter Passphrase: Retype Passphrase:	
Error Messages	% Error: The passphrases do not match.	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure WPA Mode Settings

Commands

wpa-mode {personal | enterprise}

Syntax Description	wpa-mode	Configure WPA mode settings.
	personal	Set the WPA mode to Personal.
	enterprise	Set the WPA mode to Enterprise.
Defaults	N/A	
Command Modes	ssid-ap	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan ap ssid "ap-1" 5g moxa (ssid-ap)# wpa-mode personal	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the WPA Encryption Method

Commands

wpa-encrypt {aes | tkip-aes-mixed }

Syntax Description	wpa-encrypt	Configure the WPA encryption method.
	aes	Set the WPA encryption mode to AES.
	tkip-aes-mixed	Set the WPA encryption mode to TKIP/AES Mixed.
Defaults	N/A	
Command Modes	ssid-ap	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan ap ssid "ap-1" 5g moxa (ssid-ap)# wpa-encrypt aes	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the EAPOL Version

Commands

wpa-eap-ver {1 | 2}

Syntax Description	wpa-eap-ver	Configure the EAPOL version.
	1	Use EAPOL version 1.
	2	Use EAPOL version 2.
Defaults	N/A	
Command Modes	ssid-ap	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan ap ssid "ap-1" 5g moxa (ssid-ap)# wpa-eap-ver 2	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the WPA Passphrase

Commands

wpa-key

Syntax Description	wpa-key	Configure WPA passphrase and key renewal parameters.
Defaults	N/A	
Command Modes	ssid-ap ssid-client	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan client moxa (ssid-client)# wpa-key Enter Passphrase: Retype Passphrase:	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the WPA Key Renewal Interval

Commands

wpa-key renewal <period (60-86400 sec)>

Syntax Description	wpa-key	Configure the WPA key.
	renewal	Configure the WPA key renewal interval.
	<period>	Specify the key renewal interval (60-86400 seconds).
Defaults	N/A	
Command Modes	ssid-ap	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan ap ssid "ap-1" 5g moxa (ssid-ap)# wpa-key renewal 1000	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure EAPOL RADIUS Server Settings

Commands

eap radius-server host <server (ipv4)> auth-port <port (0-65535)>] { primary | secondary}

Syntax Description	eap	Configure EAPOL-related parameters.
	radius-server	Configure the EAPOL RADIUS server.
	host	Configure the EAPOL RADIUS server host.
	<server>	Specify the EAPOL RADIUS server IP address (ipv4).
	auth-port	Configure the EAPOL RADIUS server authentication port.
	<port>	Specify the EAPOL RADIUS server TCP port number (0-65535).
	primary secondary	Set the server as the primary RADIUS server. Set the server as the secondary RADIUS server.
Defaults	N/A	
Command Modes	ssid-ap	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan ap ssid "ap-1" 5g moxa (ssid-ap)# eap radius-server host "192.168.127.3" primary Enter Shared Key: Retype Shared Key:	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the EAPOL Protocol

Commands

eap proto {tls | ttls | peap}

Syntax Description	eap	Configure EAPOL-related parameters.
	proto	Configure the EAPOL protocol.
	tls	Set the EAPOL protocol to TLS.
	ttls	Set the EAPOL protocol to TTLS.
	peap	Set the EAPOL protocol to PEAP.
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# eap proto peap	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Upload a TLS Certification File

Commands

upload certification {tftp://<server>/<filename> |
sftp ://<account>:<password>@<server>/<pathname>}

Syntax Description	upload	Upload a file.
	certification	Upload a TLS certification files.
	<source>	Specify the source.
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	Source: {tftp://<server>/<filename> sftp ://<account>:<password>@<server>/<pathname>}	
Examples	moxa (ssid-client)# upload certification tftp://192.168.127.123/abc Enter certification password: Retype certification password:	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure TTLS Inner Authentication Settings

Commands

eap ttls-inner-auth {pap | ms-chap | ms-chap-v2}

Syntax Description	eap	Configure EAPOL-related settings.
	ttls-inner-auth	Configure TTLS inner authentication settings.
	pap	Set the authentication method to PAP.
	ms-chap	Set the authentication method to MS-CHAP.
	ms-chap-v2	Set the authentication method to MS-CHAP-V2.
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# eap ttls-inner-auth pap	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure PEAP Inner Authentication Protocol Settings

Commands

eap peap-inner-auth {ms-chap-v2}

Syntax Description	eap	Configure EAPOL-related settings.
	peap-inner-auth	Configure PEAP inner authentication protocol settings.
	ms-chap-v2	Set the authentication method to MS-CHAP-V2.
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# eap peap-inner-auth ms-chap-v2	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Anonymous Name for EAPOL TTLS/PEAP

Commands

eap anonymous <anonymous name (max len: 32)>

Syntax Description	eap	Configure EAPOL-related settings.
	anonymous	Configure the anonymous name for EAPOL TTLS/PEAP.
	<anonymous name>	Specify the anonymous name (max. 32 characters).
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# eap anonymous agv_auth	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the EAPOL TTLS/PEAP Username

Commands

eap username <username (max len: 32)>

Syntax Description	eap	Configure EAPOL-related settings.
	username	Configure the username for EAPOL TTLS/PEAP.
	<username>	Specify the username (max. 32 characters).
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# eap username IT_Group	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the EAPOL TTLS/PEAP Password

Commands

eap password

Syntax Description	eap	Configure EAPOL-related settings.
	password	Configure the password for EAPOL TTLS/PEAP (8-128 characters).
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan client moxa (ssid-client)# eap password Enter passphrase: Retype passphrase:	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Clear Client Settings

Commands

no wlan client

Syntax Description	no	Reset settings to their default values.
	wlan	Reset Wi-Fi settings.
	client	Reset Client settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# no wlan client	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Modify SSID RF Band Settings

Commands

rf-band {5ghz | 2.4ghz | 2.4-or-5ghz}

Syntax Description	rf-band	[AP] Assign the SSID to a RF band. [Client] Enable the client to connect to the 5 GHz band.
	{5ghz 2.4ghz}	[AP] Assign the SSID to the 5GHz or 2.4GHz band. [Client] Enable the client to connect to the 2.4 GHz band.
	{2.4-or-5ghz}	[Client mode only] Enable the client to connect to either the 2.4 or 5 GHz band.
Defaults	N/A	
Command Modes	ssid-ap ssid-client	
Usage Guidelines	This command requires either "ssid-ap" or "ssid-client" configuration mode. The function of this command depends on the configuration it is used in.	
Examples	[AP] (config)# wlan ap ssid "test ap" 5ghz (ssid-ap)# rf-band 2.4ghz [Client] (config)# wlan client (ssid-client)# rf-band 2.4-or-5ghz	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Unicast Data Frame Transmission Rate

Commands

tx-rate {5ghz | 2.4ghz} **data** {auto | <rate>}

Syntax Description	tx-rate	Configure the transmission rate.
	{5ghz 2.4ghz}	Configure the transmission rate for the 5 GHz or 2.4 GHz band.
	data	Configure the unicast data frame transmission rate.
	auto	Set the transmission rate to Auto.
	<rate>	Specify the transmission rate: 802.11a: 6, 9, 12, 18, 24, 36, 48, 54 (Mbps) 802.11b: 1, 2, 5.5, 11 (Mbps) 802.11g: 6, 9, 12, 18, 24, 36, 48, 54 (Mbps) 802.11n: ht-mcs[0-15] 802.11ac: vht-mcs[0-9]-nss[1-2]
Defaults	N/A	
Command Modes	ssid-ap ssid-client	
Usage Guidelines	This command requires either "ssid-ap" or "ssid-client" configuration mode.	
Examples	(config)# wlan client (ssid-client)# tx-rate 5ghz data auto	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure Minimum Unicast Data Frame Transmission Rate

Commands

tx-rate {5ghz | 2.4ghz} **min-data** <rate>

Syntax Description	tx-rate	Configure the transmission rate.
	{5ghz 2.4ghz}	Configure the transmission rate for the 5 GHz or 2.4 GHz band.
	min-data	Configure the minimum unicast data frame transmission rate.
	<rate>	Specify the minimum transmission rate (0-65 Mbps).
Defaults	N/A	
Command Modes	ssid-ap ssid-client	
Usage Guidelines	This command requires either "ssid-ap" or "ssid-client" configuration mode.	
Examples	(config)# wlan client (ssid-client)# tx-rate 5ghz min-data 65	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Multicast/Broadcast Data Frame Transmission Rate

Commands

tx-rate {5ghz | 2.4ghz} **mcast-bcast** <rate>

Syntax Description	tx-rate	Configure the transmission rate.
	{5ghz 2.4ghz}	Configure the transmission rate for the 5 GHz or 2.4 GHz band.
	mcast-bcast	Configure the multicast/broadcast data frame transmission rate.
	<rate>	Specify the transmission rate.
Defaults	N/A	
Command Modes	ssid-ap	
Usage Guidelines	This command requires the "ssid-ap" configuration mode of the target SSID.	
Examples	(config)# wlan ap ssid "test ap" 5ghz (ssid-ap)# tx-rate 5ghz mcast-bcast 54	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Management Frame Transmission Rate

Commands

tx-rate {5ghz | 2.4ghz} **mgmt** <rate>

Syntax Description	tx-rate	Configure the transmission rate.
	{5ghz 2.4ghz}	Configure the transmission rate for the 5 GHz or 2.4 GHz band.
	mgmt	Configure the management frame transmission rate.
	<rate>	Specify the transmission rate.
Defaults	N/A	
Command Modes	ssid-ap ssid-client	
Usage Guidelines	This command requires the "ssid-ap" configuration mode of the target SSID.	
Examples	(config)# wlan ap ssid "test ap" 5ghz (ssid-ap)# tx-rate 5ghz mgmt 54	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset Unicast, Multicast, Broadcast, and Management Frame Transmission Rate Settings

Commands

no tx-rate

Syntax Description	no	Reset settings to their default values.
	tx-rate	Reset the transmission rate for unicast, multicast, broadcast, and management frames.
Defaults	N/A	
Command Modes	ssid-ap ssid-client	
Usage Guidelines	This command requires either the "ssid-ap" or "ssid-client" configuration mode of the target SSID.	
Examples	(config)# wlan ap ssid "test ap" 5ghz (ssid-ap)# no tx-rate	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the RTS/CTS Threshold

Commands

rts-cts <rts-cts-threshold>

Syntax Description	rts-cts	Configure the RTS/CTS threshold.
	<rts-cts-threshold>	Specify the RTS/CTS threshold (32-2346 Bytes).
Defaults	N/A	
Command Modes	ssid-ap ssid-client ssid-mesh	
Usage Guidelines	This command requires the "ssid-ap", "ssid-mesh", or "ssid-client" configuration mode of the target SSID.	
Examples	(config)# wlan ap ssid "test ap" 5ghz (ssid-ap)# rts-cts 2346	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset the RTS/CTS Threshold

Commands

no rts-cts

Syntax Description	no	Reset settings to their default values.
	rts-cts	Reset the RTS/CTS threshold.
Defaults	N/A	
Command Modes	ssid-ap ssid-client	
Usage Guidelines	This command requires either the "ssid-ap" or "ssid-client" configuration mode of the target SSID.	
Examples	(config)# wlan ap ssid "test ap" 5ghz (ssid-ap)# no rts-cts	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the AeroMesh Threshold, Management Frame, Multicast, and Broadcast Transmission Rate Settings

Commands

threshold <aeromesh-threshold (-45--85)>

tx-rate mgmt <rate>

tx-rate mcast-bcast <rate>

Syntax Description	threshold	Configure signal strength threshold settings.
	<aeromesh-threshold>	Specify the signal strength threshold for the mesh portal to form an AeroMesh network (-45 to -85 dBm).
	tx-rate	Configure the transmission rate.
	mgmt	Configure the management frame transmission rate.
	mcast-bcast	Configure the multicast/broadcast data frame transmission rate.
	<rate>	Specify the transmission rate, dependent on the wireless standard: 802.11a: 6, 9, 12, 18, 24, 36, 48, 54 (Mbps) 802.11n: ht-mcs[0-15] 802.11ac: vht-mcs[0-9]-nss[1-2]
Defaults	N/A	
Command Modes	ssid-mesh	

Usage Guidelines	Firmware v3.0 and later. For AWK-3252A and AWK-4252A Series only. Set up after entering AeroMesh configuration mode and SSID/Passphrase settings.
Examples	(ssid-mesh)# threshold -70 (ssid-mesh)# tx-rate mgmt ht-mcs0 (ssid-mesh)# tx-rate mcast-bcast ht-mcs0
Error Messages	N/A
Related Commands	N/A
Privilege Required	Network Configuration

Show the Wi-Fi Operation Mode and SSID Configuration

Commands

show wlan ssid-config

Syntax Description	show	Show the current settings and device status.
	wlan	Show the Wi-Fi configuration and status information.
	ssid-config	Show the Wi-Fi configuration.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show wlan ssid-config	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the SSID Status of All Running SSIDs

Commands

show wlan ssid-status

Syntax Description	show	Show the current settings and device status.
	wlan	Show the Wi-Fi configuration and status information.
	ssid-status	Show the enabled SSID status.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show wlan ssid-status	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring	

Show the List of Associated Clients by SSID Name

Commands

show wlan associated-client-list {ssid <ssid> {5ghz | 2.4ghz} | **ssid-idx** <ssid-index>}

Syntax Description	show	Show the current settings and device status.
	wlan	Show the Wi-Fi configuration and status information.
	associated-client-list	Show the associated client list for the specified SSID.
	ssid	Show the list of associated clients by SSID name.
	<ssid>	Specify the SSID name (max. 32 characters).
	{5ghz 2.4ghz}	Show the SSID from the 5 GHz or 2.4 GHz band.
	ssid-idx	Show the list of associated clients by SSID index.
<ssid-index>	Specify the SSID index (1-9).	
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show wlan associated-client-list ssid "Master 2" 5ghz	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring	

Show the MAC List of LAN Devices Connected to Slave Nodes

Commands

show wlan mac-list-connected-to-slave {ssid <ssid> {5ghz | 2.4ghz} | **ssid-idx** <ssid-index>}

Syntax Description	show	Show the current settings and device status.
	wlan	Show the Wi-Fi configuration and status information.
	mac-list-connected-to-slave	Show the MAC list of devices connected to Slave nodes.
	ssid	Show the MAC list of devices connected to Slave nodes by SSID name.
	<ssid>	Specify the SSID name (max. 32 characters).
	{5ghz 2.4ghz}	Show the SSID from the 5 GHz or 2.4 GHz band.
	ssid-idx	Show the MAC list of devices connected to Slave nodes by SSID index.
<ssid-index>	Specify the SSID index (1-9).	
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	This command is only available for Master mode.	
Examples	moxa# show wlan mac-list-connected-to-slave ssid AP1-SSID 5ghz	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring	

Show the List of LAN Devices Connected to Client Nodes

Commands

show wlan client-lan-device-list

Syntax Description	show	Show the current settings and device status.
	wlan	Show the Wi-Fi configuration and status information.
	client-lan-device-list	Show the list of LAN devices connected to the Client node.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	This command is only available for Client mode.	
Examples	moxa# show wlan client-lan-device-list	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring	

Configure the 5 GHz Band RF Settings

Commands

wlan rf 5ghz [rf-type {ac-only | n-ac-mixed | a-n-ac-mixed}] [channel <chan-no>] [channel-width {20 | 20-40 | 20-40-80}] [antenna {1 | 2 | all}] [txpower <tx-power (dBm)>] [antenna-gain <antenna-gain (0-18 dBi)>]

Syntax Description	wlan	Configure Wi-Fi settings.
	rf	Configure RF parameters.
	5ghz	Configure the 5 GHz band settings.
	rf-type	Configure the RF type.
	ac-only	Set the 5 GHz RF type to 802.11ac Only.
	n-ac-mixed	Set the 5 GHz RF type to 802.11n/ac Mixed.
	a-n-ac-mixed	Set the 5 GHz RF type to 802.11a/n/ac Mixed.
	channel	Configure the band channel.
	<chan-no>	Specify the channel number.
	channel-width	Configure the channel width (in MHz).
	20	Set the channel width to 20 MHz.
	20-40	Set the channel width to 20/40 MHz.
	20-40-80	Set the channel width to 20/40/80 MHz.
	antenna	Configure the antenna(s).
	1	Use antenna 1.
	2	Use antenna 2.
	all	Use all antennas.
	tx-power	Configure the maximum transmission power (in dBm).
	<tx-power>	Specify the maximum transmission power (in dBm).
	antenna-gain	Configure the antenna gain.
<antenna-gain>	Specify the antenna gain (0-18 dBi).	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan rf 5ghz rf-type ac-only	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the 2.4 GHz Band RF Settings

Commands

wlan rf 2.4ghz [rf-type {n-only | g-n-mixed | b-g-n-mixed}] [channel <chan-no>] [channel-width {20 | 20-40}] [antenna {1 | 2 | all}] [txpower <tx-power (dBm)>] [antenna-gain <antenna-gain (0-18 dBi)>]"

Syntax Description	wlan	Configure Wi-Fi settings.
	rf	Configure RF parameters.
	2.4ghz	Configure the 2.4 GHz band settings.
	rf-type	Configure the RF type.
	n-only	Set the 2.4 GHz RF type to 802.11n Only.
	g-n-mixed	Set the 2.4 GHz RF type to 802.11g/n Mixed.
	b-g-n-mixed	Set the 2.4 GHz RF type to 802.11b/g/n Mixed.
	channel	Configure the band channel.
	<chan-no>	Specify the channel number.
	channel-width	Configure the channel width (in MHz).
	20	Set the channel width to 20 MHz.
	20-40	Set the channel width to 20/40 MHz.
	antenna	Configure the antenna(s).
	1	Use antenna 1.
	2	Use antenna 2.
	all	Use all antennas.
	tx-power	Configure the maximum transmission power (in dBm).
	<tx-power>	Specify the maximum transmission power (in dBm).
	antenna-gain	Configure the antenna gain.
	<antenna-gain>	Specify the antenna gain (0-18 dBi).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan rf 2.4ghz rf-type n-only	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Channel Plan

Commands

wlan rf {2.4ghz | 5ghz} **channel-plan** <channel-list>

Syntax Description	wlan	Configure Wi-Fi settings.
	rf	Configure RF parameters.
	2.4ghz	Configure the 2.4 GHz band settings.
	5ghz	Configure the 5 GHz band settings.
	channel-plan	Configure the channel plan. To use all available channels, use the "no" version of this command.
	channel-list	Specify the channels to add to the channel plan. Enter the channel numbers separated by a comma (,). For example, '36,40,44'.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan rf 5ghz channel-plan 36,40,44	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Beacon Interval

Commands

wlan rf {2.4ghz | 5ghz} **beacon-interval** <beacon-interval (40-1000 ms)>

Syntax Description	wlan	Configure Wi-Fi settings.
	rf	Configure RF parameters.
	2.4ghz	Configure the 2.4 GHz band settings.
	5ghz	Configure the 5 GHz band settings.
	beacon-interval	Configure the beacon interval (in ms).
	<beacon-interval>	Specify the beacon interval (40-1000 ms)
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan rf 5ghz beacon-interval 100	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset RF Settings

Commands

no wlan rf {2.4ghz | 5ghz} [channel-plan]

Syntax Description	no	Reset the parameters.
	wlan	Reset Wi-Fi settings.
	rf	Reset the 2.4/5 GHz band RF settings.
	2.4ghz	Reset 2.4 GHz band RF settings.
	5ghz	Reset 5 GHz band RF settings.
	channel-plan	Reset the channel plan of the specified RF band.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# no wlan rf 2.4ghz channel-plan	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the RF Settings and the List of Available Channels

Commands

show wlan rf [channel-txpower]

Syntax Description	show	Show all modified settings.
	wlan	Show Wi-Fi-related status information.
	rf	Show the RF settings.
	channel-txpower	Show the list of available channels and their maximum transmission power.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show wlan rf	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Execute a Site Survey

Commands

wlan site-survey

Syntax Description	wlan	Configure Wi-Fi settings.
	site-survey	Execute a site survey.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan site-survey	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Roaming and MAC Cloning

Enable/Disable Turbo Roaming Analyzer

Commands

client-based-troam {enabled | disabled}

Syntax Description	client-based-troam	Configure Client-based Turbo Roaming settings.
	enabled	Enable Client-based Turbo Roaming.
	disabled	Disable Client-based Turbo Roaming.
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# client-based-troam enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Roaming Threshold

Commands

client-based-troam threshold {snr [5ghz <roam-thr-snr (5-60 dB)>] [2.4ghz <roam-thr-snr (5-60 dB)>] | signal-strength [5ghz <roam-thr-signal-strength (-100 - -35 dBm)>] [2.4ghz <roam-thr-signal-strength (-100 - -35 dBm)>]}

Syntax Description	client-based-troam	Configure Client-based Turbo Roaming settings.
	threshold	Configure the roaming threshold.
	snr	Configure the SNR roaming threshold.
	5ghz	Configure the roaming threshold for the 5 GHz band.
	2.4ghz	Configure the roaming threshold for the 2.4 GHz band.
	<roam-thr-snr>	Specify the roaming SNR threshold (5-60 dB).
	signal-strength	Configure the signal strength roaming threshold.
	<roam-thr-signal-strength>	Specify the roaming signal strength threshold (-100 - -35 dBm).
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# client-based-troam threshold snr 5ghz 30	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Roaming Difference

Commands

client-based-troam diff <roam-diff (5-30)>

Syntax Description	client-based-troam	Configure Client-based Turbo Roaming settings.
	diff	Configure the signal strength or SNR difference between the AP candidate and the connecting APs.
	<roam-diff>	Specify the SNR and signal strength roaming difference (5-30).
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# client-based-troam diff 10	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset Client-based Turbo Roaming Settings

Commands

no client-based-troam

Syntax Description	no	Reset settings to their default values.
	client-based-troam	Reset Client-based Turbo Roaming settings.
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# no client-based-troam	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show Client-based Turbo Roaming Settings

Commands

show wlan client-based-troam

Syntax Description	show	Show all modified settings.
	wlan	Show Wi-Fi-related status information.
	client-based-troam	Show Client-based Turbo Roaming settings.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show wlan client-based-troam	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure Fast Transition (802.11r) Settings

Commands

fast-transition {enabled | disabled}

fast-transition threshold {

snr [5ghz <roam-thr-snr (5-60 dB)>]

[2.4ghz <roam-thr-snr (5-60 dB)>]

| signal-strength

[5ghz <roam-thr-signal-strength (-100 - -35 dBm)>]

[2.4ghz <roam-thr-signal-strength (-100 - -35 dBm)>]]

fast-transition diff <roam-diff (5-30)>

Syntax Description	fast-transition	Configure Fast Transition settings.
	{enabled disabled}	Enable or disable Fast Transition.
	threshold	Configure the roaming threshold.
	snr	Configure the SNR roaming threshold.
	5ghz	Configure the roaming threshold for the 5 GHz band.
	2.4ghz	Configure the roaming threshold for the 2.4 GHz band.
	<roam-thr-snr>	Specify the roaming SNR threshold (5-60 dB).
	signal-strength	Configure the signal strength roaming threshold.
	<roam-thr-signal-strength>	Specify the roaming signal strength threshold (-100 - -35 dBm).
diff		Configure the signal strength or SNR difference between the AP candidate and the connecting APs.
	<roam-diff (5-30)>	Specify the SNR and signal strength roaming difference (5-30).
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	Firmware v3.0 and later. For client and client-router mode only.	
Examples	(ssid-client)# fast-transition diff 10 (ssid-client)# fast-transition threshold snr 5ghz 20	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset Fast Transition Settings

Commands

no fast-transition

Syntax Description	no	Reset the relevant feature configuration to the defaults.
	fast-transition	Reset Fast Transition settings.
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	Firmware v3.0 and later. For client and client-router mode only.	
Examples	(ssid-client)# no fast-transition	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show Fast Transition Settings

Commands

show wlan fast-transition

Syntax Description	show	Show relevant feature information.
	wlan	Show WLAN-related settings.
	fast-transition	Show Fast Transition settings.
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	Firmware v3.0 and later. For client and client-router mode only.	
Examples	(ssid-client)# show wlan fast-transition	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure MAC Cloning Settings

Commands

mac-cloning{enabled [method {auto [ethernet <interface-id (1-2)>] | static [mac <clone-mac-addr (MAC addr)>]}] | disabled }

Syntax Description	mac-cloning	Configure MAC cloning settings.
	enabled	Enable MAC cloning.
	method	Configure the MAC cloning method.
	auto	Set the cloning method to Auto.
	ethernet	Configure the Ethernet interface that the Wi-Fi client will clone the MAC address from.
	<interface-id>	Specify the index of the Ethernet interface that the Wi-Fi client will clone the MAC address from (1-2).
	static	Set the cloning method to Static.
	<clone-mac-addr>	Specify the static clone MAC address (e.g., 00:11:22:aa:bb:cc).
disabled	Disable MAC cloning.	
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# mac-cloning enable method auto ethernet 2	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Local Link Fault Pass-Through

Commands

lfpt local {enabled | disabled} **ethernet** <index (1-5)>

Syntax Description	lfpt local	Configure local link fault pass-through settings.
	{enabled disabled}	Specify to enable or disable Link Fault Pass-Through. Default disabled.
	ethernet	Configure the Ethernet interface to monitor for link down.
	<index (1-5)>	Specify the Ethernet LAN port number to monitor link down.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# lfpt local enabled ethernet 1	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Remote Link Fault Pass-Through

Commands

lfpt remote {enabled <remote-host (max len: 60)> | disabled} **timeout** <timeout (100-1000)> **disconn-interval** <disconnection-interval (1-30)> **disconn-retry-cnt** <disconnection-retry-count (1-5)> **recovery-interval** <recovery-interval (1-30)> **recovery-retry-cnt** <recovery-retry-count (1-5)>

Syntax	lfpt remote	Configure local link fault pass-through settings.
Description	{enabled disabled}	Specify to enable or disable Link Fault Pass-Through. Default disabled. When enabled append the remote host IP address max length 60 char..
	timeout	Specify timeout criteria in milliseconds.
	<timeout (100-1000)>	Timeout range 100 ~ 1000 milliseconds.
	disconn-interval	Disconnect detection, specify the detection interval in seconds for device to check connectivity with remote host.
	<disconnection-interval (1-30)>	Check interval frequency every 1 ~ 30 seconds.
	disconn-retry-cnt	Disconnect criteria, specify the number of timeout retries for device to deem connectivity with remote host lost.
	<disconnection-retry-count (1-5)>	Retry count range 1 ~ 5 attempts.
	recovery-interval	Connection recovered detection, specify the detection interval in seconds for device to check if connectivity with remote host has been restored.
	<recovery-interval (1-30)>	Check interval frequency every 1 ~ 30 seconds.
	recovery-retry-cnt	Remote host connection restored criteria, specify the number retries for device to receive reply from remote host within specified timeout period.
	<recovery-retry-count (1-5)>	Retry count range 1 ~ 5 attempts.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# lfpt remote enabled 192.168.127.15 timeout 400 disconn-interval 15 disconn-retry-cnt 3 recovery-interval 15 recovery-retry-cnt 3	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Reset Link Fault Pass-Through

Commands

no lfpt

Syntax Description	no	Reset designated feature configuration to default.
	lfpt	Specify the feature to restore to its default configuration.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# no lfpt	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Show Link Fault Pass-Through

Commands

show lfpt {status | config}

Syntax Description	show	Display the target info for the designated feature that follows.
	lfpt	Display the designated info of Link Fault Pass-Through that follows.
	{status config}	Specify to show the lfpt status or the lfpt configuration details.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# show lfpt config	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Ethernet

Access Config-if Mode to Configure Network Interfaces

Commands

interface {**ethernet** <interface-id(1-2)> | **ssid-ap** <ssid (rf-band/ssid-name)> | **ssid-client**}

Syntax Description	interface	Configure network interface settings.
	ethernet	Configure LAN interface settings.
	<interface-id>	Specify the LAN interface index (1-2).
	ssid-ap	Configure Wi-Fi interface settings for AP mode.
	<ssid>	Specify the RF band and SSID name (e.g. 5ghz/ssid-1).
	ssid-client	Configure Wi-Fi interface settings for Client-based mode.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# interface ethernet 2 moxa (config-if)#	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management or Network Configuration	

Enable the Ethernet Interfaces

Commands

no shutdown

Syntax Description	no	Reset settings to their default values.
	shutdown	Enable the interface.
Defaults	N/A	
Command Modes	Config-if	
Usage Guidelines	N/A	
Examples	moxa (config-if)# no shutdown	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Disable the Ethernet Interfaces

Commands

Shutdown

Syntax Description	shutdown	Disable the interface.
Defaults	N/A	
Command Modes	Config-if	
Usage Guidelines	N/A	
Examples	moxa (config-if)# shutdown	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the Interface Description.

Commands

description <description (max len: 127)>

Syntax Description	description	Configure the description.
	<description>	Enter a description (max. 127 characters).
Defaults	N/A	
Command Modes	Config-if	
Usage Guidelines	N/A	
Examples	moxa (config-if)# description ETH_LAN1	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Show the Interface Status

Commands

show interface [status]

Syntax Description	show	Show all modified settings.
	interface	Show interface-related information.
	status	Show interface status.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show interface status	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring	

Connection Check & Recovery

Configure Client-to-AP Link Check Settings

Commands

ap-link-check {enabled | disabled}[check-timeout <check-timeout (10-60 sec)>] [reset-conn {enabled | disabled}] [reset-conn-cnt <retry-count (1-5)>] [reboot {enabled | disabled}] [reboot-cnt <reboot-count (1-5)>]

Syntax Description	ap-link-check	Configure Client-to-AP Link Check settings.
	enabled	Enable Client-to-AP Link Check.
	disabled	Disable Client-to-AP Link Check.
	check-timeout	Configure the Client-to-AP Link Check timeout threshold.
	<check-timeout>	Specify the Client-to-AP Link Check timeout threshold (10-60 sec).
	reset-conn	Configure the Reset Connection Recovery action.
	enabled	Reset the Wi-Fi connection if the Client-to-AP Link Check fails.
	disabled	Do not reset the Wi-Fi connection if the Client-to-AP Link Check fails.
	reset-conn-cnt	Configure the maximum number of times the device will perform the Reset Wi-Fi Connection recovery action.
	<retry-count>	Specify the maximum number of times the device will perform the Reset Wi-Fi Connection recovery action (1-5).
	reboot	Configure the Reboot Recovery action.
	enabled	Reboot the device if the Client-to-AP Link Check fails.
	disabled	Do not reboot the device if the Client-to-AP Link Check fails.
	reboot-cnt	Configure the maximum number of times the device will perform the Reboot Device recovery action.
<reboot-count>	Specify the maximum number of times the device will perform the Reboot Device recovery action (1-5).	
Defaults	N/A	
Command Modes	ssid-client	
Usage Guidelines	N/A	
Examples	moxa (ssid-client)# ap-link-check enabled check-timeout 20 reset-conn enabled reset-conn-cnt 3 reboot enabled reboot-cnt 3	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Candidate AP Criteria for the AP Alive Check Function

Commands

wlan ap-alive-check ap-threshold {snr [5ghz <snr (5-60 dB)>] [2.4ghz <snr (5-60 dB)>] | signal-strength [5ghz <signal-strength (-100 - -35 dBm)>] [2.4ghz <signal-strength (-100 - -35 dBm)>]}

Syntax Description	wlan	Configure Wi-Fi settings.
	ap-alive-check	Configure AP Alive Check settings.
	ap-threshold	Configure the candidate AP criteria for the AP Alive Check function.
	snr	Configure the SNR candidate threshold.
	signal-strength	Configure the signal strength threshold for candidate APs.
	5ghz	Configure the threshold for the 5 GHz band of the AP.
	2.4ghz	Configure the threshold for the 2.4 GHz band of the AP.
	<snr>	Specify the SNR threshold (5-60 dB).
	<signal-strength>	Specify the signal strength threshold (-100 - -35 dBm).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan ap-alive-check ap-threshold snr 5ghz 30	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure Wi-Fi Remote Host Check Settings

Commands

wlan remote-host-check {enabled | disabled}[**host-type** {static <host (max len: 60)> | dynamic}] [**check-interval** <check-interval (1-60 sec)>] [**check-timeout** <check-timeout (100-1000 ms)>] [**retry-interval** <retry-interval (1-30 sec)>] [**retry-cnt** <retry-count (1-5)>]

Syntax Description	wlan	Configure Wi-Fi settings.
	remote-host-check	Configure Wi-Fi Remote Host Check settings.
	enabled	Enable Remote Host Check.
	disabled	Disable Remote Host Check.
	host-type	Configure the host type.
	static	Set the host type to Static.
	<host>	Specify the remote host to check (max. 60 characters).
	dynamic	Set the host type to Dynamic.
	check-interval	Configure the Remote Host Check interval.
	<check-interval>	Specify the Remote Host Check interval (1-60 sec).
	check-timeout	Configure the Remote Host Check timeout.
	<check-timeout>	Specify the Remote Host Check timeout (10-1000 ms).
	retry-interval	Configure the Remote Host Check retry interval.
	<retry-interval>	Specify the Remote Host Check retry interval (1-30 sec).
retry-cnt	Configure the Remote Host Check retry count.	
<retry-count>	Specify the Remote Host Check retry count (1-5).	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# wlan remote-host-check enabled host-type static www.moxa.com check-interval 10 check-timeout 500 retry-interval 5 retry-cnt 3	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

AP-based Connection Management

Wireless Connection Management

Terminate the Wi-Fi Connection

Commands

wlan terminate <mac-addr>

Syntax Description	wlan	Manage Wi-Fi connections.
	terminate	Terminate a client's Wi-Fi connection
	<mac-addr>	Specify the MAC address of the client.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later	
Examples	moxa# wlan disconn 00:90:e8:11:22:33	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Connection Management

Enable or Disable AP-based Disconnection

Commands

ap-based-disconnection {enabled | disabled}

Syntax Description	ap-based-disconnection	Configure AP-based Disconnection settings.
	enable	Enable AP-based Disconnection.
	disable	Disable AP-based Disconnection.
Defaults	N/A	
Command Modes	ssid-ap	
Usage Guidelines	Firmware v2.0 and later	
Examples	moxa (ssid-ap)#ap-based-disconnection enable	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Configure the AP-based Disconnection Threshold

Commands

ap-based-disconnection threshold {snr [5ghz <disconn-thr-snr (5-60 dB)>] [2.4ghz <disconn-thr-snr (5-60 dB)>] | signal-strength [5ghz <disconn-thr-signal-strength (-100 - -35 dBm)>] [2.4ghz <disconn-thr-signal-strength (-100 - -35 dBm)>]}

Syntax Description	ap-based-disconnection threshold	Configure AP-based Disconnection settings.
		Configure the AP-based Disconnection threshold.
	snr [5ghz <disconn-thr-snr (5-60 dB)>] [2.4ghz <disconn-thr-snr (5-60 dB)>]	Set Signal-to-Noise Ratio (SNR) as the mechanism for AP-based Disconnection and specify the dB threshold for the 2.4 and 5 GHz band.
	signal-strength [5ghz <disconn-thr-signal-strength (-100 - -35 dBm)>] [2.4ghz <disconn-thr-signal-strength (-100 - -35 dBm)>]	Set Signal Strength as the mechanism for AP-based Disconnection and specify the dBm threshold for the 2.4 and 5 GHz band.
Defaults	N/A	
Command Modes	ssid-ap	
Usage Guidelines	Firmware v2.0 and later	
Examples	moxa (ssid-ap)#ap-based-disconnection threshold snr 5ghz 30 dB 2.4ghz 30 dB	
Error Messages	N/A	
Related Commands	moxa (ssid-ap)# no ap-based-disconnection	
Privilege Required	Network	

IP Configuration

Configure the Device Management IP Address

Commands

ip management {lan | wan} address {dhcp | <device-ip (ipv4)> <netmask> [<gateway (ipv4)>]}

Syntax Description	ip	Configure device network settings.
	management	Configure device network interface settings.
	lan	Configure LAN settings.
	wan	Configure WAN settings.
	address	Configure the device management IP address.
	dhcp	Assign the management IP address using DHCP.
	<device-ip>	Specify the device IP address (ipv4).
	<netmask>	Specify the netmask.
	<gateway>	Specify the gateway (ipv4).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ip management wan address 192.168.127.44 255.255.255.0 192.168.128.254	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the Device DNS Server Address

Commands

ip management {lan | wan} name-server <server-id (1-2)> <dns-server (ipv4)>

Syntax Description	ip	Configure device network settings.
	management	Configure device network interface settings.
	lan	Configure LAN settings.
	wan	Configure WAN settings.
	name-server	Configure the device DNS server address.
	<server-id>	Specify the index of the DNS server (1-2).
	<dns-server>	Specify the DNS server address (IPv4).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ip management lan name-server 1 192.168.127.5	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Reset the Device Management IP Address

Commands

no ip management {lan | wan} address

Syntax Description	no	Reset settings to their default values.
	ip	Reset device network settings.
	management	Reset device network interface settings.
	lan	Reset LAN network settings.
	wan	Reset WAN network settings.
	address	Reset the device management IP address.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# no ip management lan address	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Reset the Device DNS Server Settings

Commands

no ip management {lan | wan} name-server <server-index (1-2)>

Syntax Description	no	Reset settings to their default values.
	ip	Reset device network settings.
	management	Reset device network interface settings.
	lan	Reset LAN network settings.
	wan	Reset WAN network settings.
	name-server	Reset the DNS server settings.
	<server-index>	Specify the DNS server index (1-2).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# no ip management lan name-server 2	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Show the Device Network Management IP Status

Commands

show ip management [status]

Syntax Description	show	Show all modified settings
	ip	Show device network settings.
	management	Show device network interface settings or status.
	status	Show the device management IP address status.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show ip management status	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the Default Gateway

Commands

default-gateway <gateway (ipv4)>

Syntax Description	default-gateway	Configure the DHCP pool default gateway.
	<gateway (ipv4)>	Specify the default gateway address.
Defaults	N/A	
Command Modes	dhcp-pool	
Usage Guidelines	N/A	
Examples	(dhcp-pool)# default-gateway 192.168.127.200	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the DHCP IP Lease Time

Commands

lease <duration (10-14400 min)>

Syntax Description	lease	Configure the DHCP IP address lease time.
	<duration (10-14400 min)>	Specify the IP address lease time (10-14400 min).
Defaults	N/A	
Command Modes	dhcp-pool	
Usage Guidelines	N/A	
Examples	(dhcp-pool)# lease 10000	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the DNS Servers

Commands

dns-server <DNS server 1 (ipv4)> [<DNS server 2 (ipv4)>]

Syntax Description	dns-server	Configure DNS server settings.
	<DNS server 1 (ipv4)>	Specify the primary DNS server.
	<DNS server 2 (ipv4)>	Specify the secondary DNS server.
Defaults	N/A	
Command Modes	dhcp-pool	
Usage Guidelines	N/A	
Examples	(dhcp-pool)# dns-server 192.168.127.202	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the NTP Server

Commands

ntp-server <NTP server>

Syntax Description	ntp-server	Configure NTP server settings.
	<NTP server>	Specify the NTP server.
Defaults	N/A	
Command Modes	dhcp-pool	
Usage Guidelines	N/A	
Examples	(dhcp-pool)# ntp-server 1.pool.ntp.org	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure LAN IPv6 Address

Commands

ipv6 management lan address {disable | dynamic | <device-ipv6/prefix-length> [<gateway (ipv6)>]}

Syntax Description	ipv6 management lan address	Configure LAN interface IPv6 address.
	disabled	Disable IPv6 address. Default disabled.
	dynamic	Enable IPv6 address and acquire IPv6 address via dynamic option using SLAAC/DHCPv6.
	device-ipv6/prefix-length [<gateway (ipv6)>]	Enable IPv6 address and statically specify the IPv6 address/prefix length and optional IPv6 gateway.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# ipv6 management lan address 2001:b011:20e0:cb8:211:32ff:fe88:1d16/64	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure WAN IPv6 Address

Commands

ipv6 management wan address {disable | dynamic | relay | dhcpv6-pd | <device-ipv6/prefix-length> [<gateway (ipv6)>]}

Syntax Description	ipv6 management wan address	Configure WAN interface IPv6 address.
	disabled	Disable IPv6 address. Default disabled.
	dynamic	Enable IPv6 address and acquire IPv6 address via dynamic option using SLAAC/DHCPv6.
	relay	Enable IPv6 address and acquire IPv6 address through SLAAC/DHCPv6 method while also acting as an SLAAC/DHCPv6 Relay.
	dhcpv6-pd	Enable IPv6 address and acquire IPv6 address through SLAAC/DHCPv6 and dynamically assign IPv6 addresses using delegated IPv6 prefixes.
	device-ipv6/prefix-length [<gateway (ipv6)>]	Enable IPv6 address and statically specify the IPv6 address/prefix length and optional IPv6 gateway.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# ipv6 management lan address dhcpv6-pd	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Reset IPv6 Address Configurations

Commands

no ipv6 management {lan | wan} **address**

Syntax Description	no	Reset designated feature configuration to default.
	ipv6 management	Specify ipv6 network interface to restore to its default configuration.
	{lan wan}	Specify to reset the WAN or LAN interface to default configuration.
	address	Specify to reset the ipv6 address configuration.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# no ipv6 management lan address	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Show ipv6 Parameters

Commands

show ipv6 management {status | config}

Syntax Description	show	Display the target info for the designated feature that follows.
	ipv6 management	Display the ipv6 network interface information.
	{status config}	Specify to show the current interface status or the configuration details.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# show ipv6 management config	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure Gratuitous ARP

Commands

garp {enabled | disabled} [interval <interval (10-1000)>]

Syntax Description	garp	Configure Gratuitous ARP settings.
	{enabled disabled}	Enable or disable Gratuitous ARP functionality.
	interval	Configure the Gratuitous ARP interval settings.
	<interval (10-1000)>	Specify the Gratuitous ARP interval (10-1000 sec).
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v3.0 and later Only available in Client/Client-Router mode.	
Examples	(config)# garp enabled interval 10	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Configure Gratuitous ARP Entries

Commands

garp <index (1-8)> **status** {enabled | disabled} **ip** <ip-address> **mac** <mac-address> **show**

Syntax Description	garp	Configure Gratuitous ARP settings.
	<index (1-8)>	Specify the index of the Gratuitous ARP entry (1-8).
	status	Configure Gratuitous ARP entry settings.
	{enabled disabled}	Enable or disable the Gratuitous ARP entry.
	ip	Configure the IP address of the Gratuitous ARP entry.
	<ip-address>	Specify the IP address of the Gratuitous ARP entry.
	mac	Configure the MAC address of the Gratuitous ARP entry.
	<mac-address>	Specify the MAC address of the Gratuitous ARP entry.
	show	Show the settings of the specified Gratuitous ARP entry.
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v3.0 and later Only available in Client/Client-Router mode.	
Examples	(config)# garp 1 (garp)# mac 00:90:e8:11:22:33 (garp)# ip 192.168.126.1 (garp)# status enable (garp)# show	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Show the Gratuitous ARP Settings

Commands

show garp

Syntax Description	show	Show relevant feature settings.
	garp	Show Gratuitous ARP settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Firmware v3.0 and later Only available in Client/Client-Router mode.	
Examples	moxa# show garp	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Reset Gratuitous ARP Entry Settings

Commands

no garp [entry {all | <index (1-8)>}]

Syntax Description	no	Reset the feature configuration to the defaults.
	garp	Reset Gratuitous ARP settings.
	{all}	Delete all Gratuitous ARP entries.
	<index (1-8)>	Delete the Gratuitous ARP entry with the specified index (1-8).
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v3.0 and later Only available in Client/Client-Router mode.	
Examples	(config)# no garp entry all	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Routing and NAT

Static Route

Create a New Static Route Entry

Commands

ip route <index (1-32)> <ip-addr> <netmask> <next-hop> <metric (1-32766)> [iface {lan | wan}]

Syntax Description	ip	Configure device network settings.
	route	Configure static route settings.
	<index>	Specify the index of the routing entry(1-32).
	<ip-addr>	Specify the destination address (IPv4).
	<netmask>	Specify the destination subnet mask of the route entry.
	<next-hop>	Specify the next hop of the route entry (IPv4).
	<metric>	Specify the metric of the route entry (1-32766).
	iface	Configure the interface of the route entry (default: WAN).
	lan	Set the route interface to LAN.
	wan	Set the route interface to WAN.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	

Examples	moxa (config)# ip route 2 192.168.127.10 255.255.255.0 192.168.127.251 10 iface lan
Error Messages	N/A
Related Commands	N/A
Privilege Required	Network Configuration

Enable/Disable the Static Route

Commands

ip route <index (1-32)> {enabled | disabled}

Syntax Description	ip	Configure device network settings.
	route	Configure static route settings.
	<index>	Specify the index of the routing entry (1-32).
	enabled	Enable this static route entry.
	disabled	Disable this static route entry.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ip route 3 enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Static Route Name

Commands

ip route <index (1-32)> name <name (max len: 31)>

Syntax Description	ip	Configure device network settings.
	route	Configure static route settings.
	<index>	Specify the index of the routing entry (1-32).
	name	Configure the name of the static route entry.
	<name>	Enter the name of the static route entry (max. 31 characters).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ip route 3 name AGV_PLC	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset the Static Routing Table

Commands

no ip route [<index (1-32)>]

Syntax Description	no	Delete or reset.
	ip	Configure device network settings.
	route	Reset the static routing table.
	<index>	Specify the index of the routing table (1-32).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# no ip route 3	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the Static Routing Table

Commands

ip route show

Syntax Description	ip	Configure device network settings.
	route	Configure static route settings.
	show	Show the static routing table settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ip route show	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the Routing Table Settings

Commands

show ip route config

Syntax Description	show	Show all modified settings.
	ip	Configure device network settings.
	route	Show the routing table.
	config	Show the routing table settings.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show ip route config	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the Routing Table

Commands

show ip route [status]

Syntax Description	show	Show all modified settings.
	ip	Configure device network settings.
	route	Show the routing table.
	status	Show the routing table status.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show ip route status	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring	

NAT

Configure NAT Settings

Commands

ip nat {enabled | disabled}

Syntax Description	ip	Configure device network settings.
	nat	Configure NAT settings.
	enabled	Enable NAT.
	disabled	Disable NAT.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ip nat disabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure N-to-1 NAT Settings

Commands

ip nat n-to-1 {enabled | disabled} [<name (max len: 31)>]

Syntax Description	ip	Configure device network settings.
	nat	Configure NAT settings.
	n-to-1	Configure N-to-1 NAT settings.
	enabled	Enable N-to-1 NAT.
	disabled	Disable N-to-1 NAT.
	<name>	Specify the name of the N-to-1 NAT rule (Max. 31 characters).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ip nat n-to-1 enabled IPcam2	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Create a New Rule or Edit a Rule With a Specific Priority

Commands

ip nat {new | <priority (1-31)>}

Syntax Description	ip	Configure device network settings.
	nat	Configure NAT settings.
	new	Create a new rule without specifying a priority. A priority will be assigned automatically.
	<priority>	Specify the priority of the rule (1-31).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Executing this command will enter "config-nat" mode to configure the rule details.	
Examples	moxa (config)# ip nat new moxa (config)# ip nat 1	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Enable/Disable a NAT Rule

Commands

ip nat <priority (1-31)> {enabled | disabled}

Syntax Description	ip	Configure device network settings.
	nat	Configure NAT settings.
	<priority>	Specify the NAT rule priority (1-31) to enable or disable.
	enabled	Enable the NAT rule.
	disabled	Disable the NAT rule.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ip nat 3 disabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Enable/Disable the Specified NAT Rule in Config-nat Mode

Commands

status {enabled | disabled}

Syntax Description	status	Configure the status of this rule.
	enabled	Enable the NAT rule.
	disabled	Disable the NAT rule.
Defaults	N/A	
Command Modes	Config-nat	
Usage Guidelines	Refer to the " Create a New Rule or Edit a Rule With a Specific Priority " command for how to enter config-nat mode.	
Examples	moxa (config-nat)# status enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Change the Mode of the NAT Rule in Config-nat Mode

Commands

mode {1-to-1 | pat}

Syntax Description	mode	Configure the NAT mode of this rule.
	1-to-1	Set the NAT mode to 1-to-1.
	pat	Set the NAT mode to Port Forwarding.
Defaults	N/A	
Command Modes	Config-nat	
Usage Guidelines	Refer to the " Create a New Rule or Edit a Rule With a Specific Priority " command for how to enter config-nat mode.	
Examples	moxa (config-nat)# mode pat	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Change the Priority of the NAT Rule in Config-nat Mode

Commands

priority <priority (1-31)>

Syntax Description	priority	Configure the priority of this rule.
	<priority>	Specify the priority of this rule (1-31).
Defaults	N/A	
Command Modes	Config-nat	
Usage Guidelines	Refer to the " Create a New Rule or Edit a Rule With a Specific Priority " command for how to enter config-nat mode.	
Examples	moxa (config-nat)# priority 1	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure 1-to-1 NAT/Port Forwarding Settings

Commands

original [**dst-ip** {any | <dest-ipaddr (ipv4)> | <dest-ipaddr-range (ip1-ip2)>}] [**dst-port** {any | <dest-port (0-65535)> | <dest-port-range (port1-port2)>}] **translated dst-ip** {any | <dest-ipaddr (ipv4)> [dst-port {any | <dest-port (0-65535)>}] **protocol** {tcp | udp | tcp-udp}

Syntax Description	original	Configure the condition of this rule.
	translated	Configure the translating action.
	dst-ip	Configure the destination IP address.
	any	Set the destination IP address to Any.
	<dest-ipaddr>	Specify the destination IP address (IPv4).
	<range-of-dest-ip>	Specify the destination IP range (ip1-p2, e.g., 192.168.127.1-192.168.127.10).
	dst-port	Configure the destination port.
	any	Set the destination port to Any.
	<dest-port>	Specify the destination port (0-65535).
	<range-of-dest-port>	Specify the destination port range (port1-port2, e.g., 404-410).
	protocol	Configure the protocol of this rule.
	tcp	Set the protocol to TCP.
	udp	Set the protocol to UDP.
tcp-udp	Set the protocol to TCP and UDP.	
Defaults	N/A	
Command Modes	Config-nat	
Usage Guidelines	N/A	
Examples	moxa (config-nat)# original dst-ip 192.168.128.10-192.168.128.20 moxa (config-nat)# translated dst-ip 192.168.127.110 moxa (config-nat)# protocol tcp-udp moxa (config-nat)# original dst-port 100 moxa (config-nat)# translated dst-ip 192.168.127.110 dst-port 3030	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Name of the NAT Rule in Config-nat Mode

Commands

name <name (max len: 31)>

Syntax Description	name	Configure the name of this rule.
	<name>	Specify the name of this rule (max. 31 characters).
Defaults	N/A	
Command Modes	Config-nat	
Usage Guidelines	Refer to the " Create a New Rule or Edit a Rule With a Specific Priority " command for how to enter config-nat mode.	
Examples	moxa (config-nat)# name IPcam2	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Description of the Rule in Config-nat Mode

Commands

desc <description (max len: 127)>

Syntax Description	desc	Configure the description of this rule.
	<description>	Enter a description for this rule (max. 127 characters).
Defaults	N/A	
Command Modes	Config-nat	
Usage Guidelines	Refer to the " Create a New Rule or Edit a Rule With a Specific Priority " command for how to enter config-nat mode.	
Examples	moxa (config-nat)# desc rule for WAN to IPcam2 IP translation	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset all NAT Settings

Commands

no ip nat

Syntax Description	no	Reset or delete configurations.
	ip	Reset device network settings.
	nat	Reset NAT settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# no ip nat	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset a NAT Rule

Commands

no ip nat [<priority (1-32)>]

Syntax Description	no	Reset or delete configurations.
	ip	Reset device network settings.
	nat	Reset NAT settings.
	<priority>	Reset the specified NAT rule (1-32).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# no ip nat 2	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show a NAT Rule

Commands

ip nat show [<priority (1-32)>]

Syntax Description	ip	Configure device network settings.
	nat	Configure NAT settings.
	show	Show NAT rule settings.
	<priority>	Specify the priority of the NAT rule (1-32).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ip nat show 2	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show All NAT Rules

Commands

ip nat show

Syntax Description	ip	Configure device network settings.
	nat	Configure NAT settings.
	show	Show NAT rule settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# ip nat show	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Failsafe Password

Commands

fail-safe

Syntax Description	fail-safe	Configure failsafe password settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# fail-safe Enter New Password: Retype New Password:	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Firewall

Layer 2 Policy

Configure the Layer 2 Firewall Policy and the Default Action

Commands

firewall l2-policy {enabled | disabled} [**default-action** {drop | accept}]

Syntax Description	firewall	Configure firewall settings.
	l2-firewall	Configure Layer 2 firewall policy settings.
	enabled	Enable the Layer 2 firewall policy.
	disabled	Disable the Layer 2 firewall policy.
	default-action	Configure the default action of the Layer 2 firewall policy.
	drop	Drop all packets that do not match any rules.
accept	Accept all packets that do not match any rules.	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# firewall l2-policy enabled default-action drop	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the L2 Policy List in Configuration Mode

Commands

firewall l2-policy show

Syntax Description	firewall	Configure firewall settings.
	l2-firewall	Configure Layer 2 firewall policy settings.
	show	Show the Layer 2 firewall policy settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# firewall l2-policy show	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Create a New L2 Policy Rule or Edit an Existing Rule With a Specific Priority

Commands

firewall l2-policy {new | <priority (1-64)>}

Syntax Description	firewall	Configure firewall settings.
	l2-firewall	Configure Layer 2 firewall policy settings.
	new	Create a new rule without specifying a priority. A priority will be assigned automatically.
	priority	Specify the priority of the rule (1-64).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Create a new rule or edit an existing rule with the specified priority. Executing this command will automatically enter "fw-l2" configuration mode.	
Examples	moxa (config)# firewall l2-policy new moxa (config)# firewall l2-policy 3	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Enable/Disable the L2 Policy Rule

Commands

status {enabled | disabled}

Syntax Description	status	Enable or disable this rule.
	enabled	Enable this rule.
	disabled	Disable this rule.
Defaults	N/A	
Command Modes	fw-l2	
Usage Guidelines	Enable or disable this rule. Refer to Create a New L2 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l2" mode.	
Examples	moxa (fw-l2)# status enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Priority of the L2 Policy Rule

Commands

priority <priority (1-64)>

Syntax Description	priority	Configure the priority of this rule.
	<priority>	Specify the priority of the rule (1-64).
Defaults	N/A	
Command Modes	fw-l2	
Usage Guidelines	Set the priority of this rule. Refer to Create a New L2 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l2" mode.	
Examples	moxa (fw-l2)# priority 5	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Action of the L2 Policy Rule

Commands

action {accept | drop}

Syntax Description	action	Configure the action of this rule.
	accept	Accept any packets that match this rule.
	drop	Drop any packets that match this rule.
Defaults	N/A	
Command Modes	fw-l2	
Usage Guidelines	Configure the action of this rule. Refer to Create a New L2 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l2" mode.	
Examples	moxa (fw-l2)# action drop	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Source MAC of the L2 Policy Rule

Commands

src-mac <src-mac-address>

Syntax Description	src-mac	Configure the source MAC address of this rule.
	<src-mac-address>	Specify the source MAC address of this rule.
Defaults	N/A	
Command Modes	fw-l2	
Usage Guidelines	Refer to Create a New L2 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l2" mode.	
Examples	moxa (fw-l2)# src-mac 00:90:E8:01:02:03	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Destination MAC of the L2 Policy Rule

Commands

dst-mac <dst-mac-address>

Syntax Description	dst-mac	Configure the destination MAC address of this rule.
	<dst-mac-address>	Specify the destination MAC address of this rule.
Defaults	N/A	
Command Modes	fw-l2	
Usage Guidelines	Refer to Create a New L2 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l2" mode.	
Examples	moxa (fw-l2)# dst-mac 00:90:E8:01:02:08	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Delete a Specific or All L2 Policy Rules

Commands

no firewall l2-policy {all | <priority (1-64)>}

Syntax Description	no	Delete a configuration.
	firewall	Configure firewall settings.
	l2-firewall	Configure Layer 2 firewall policy settings.
	all	Delete all Layer 2 firewall policy rules.
	priority	Delete the Layer 2 firewall policy rule with the specified priority (1-64).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Delete Layer 2 firewall policy rules.	
Examples	moxa (config)# no firewall l2-policy all moxa (config)# no firewall l2-policy 3	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Layer 3 Policy

Configure the Layer 3 Firewall Policy and the Default Action

Commands

firewall l3-policy {enabled | disabled} [**default-action** {drop | accept}]

Syntax Description	firewall	Configure firewall settings.
	l3-firewall	Configure the Layer 3 firewall policy.
	enabled	Enable the Layer 3 firewall policy.
	disabled	Disable the Layer 3 firewall policy.
	default-action	Configure the default action of the Layer 3 firewall policy.
	drop	Drop all packets that do not match any rules.
	accept	Accept all packets that do not match any rules.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# firewall l3-policy enabled default-action drop	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the L3 Policy List in Configuration Mode

Commands

firewall l3-policy show

Syntax Description	firewall	Configure firewall settings.
	l3-firewall	Configure Layer 3 firewall policy settings.
	show	Show the Layer 3 firewall policy settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# firewall l3-policy show	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Create a New L3 Rule or Edit an Existing Rule With a Specific Priority

Commands

firewall l3-policy {new | <priority (1-64)>}

Syntax Description	firewall	Configure firewall settings.
	l3-firewall	Configure Layer 3 firewall policy settings.
	new	Create a new rule without specifying a priority. A priority will be assigned automatically.
	priority	Specify the priority of the rule (1-64).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Create a new rule or edit an existing rule with the specified priority. Executing this command will automatically enter "fw-l3" configuration mode.	
Examples	moxa (config)# firewall l3-policy new moxa (config)# firewall l3-policy 3	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Enable/Disable the L3 Policy Rule

Commands

status {enabled | disabled}

Syntax Description	status	Enable or disable this rule.
	enabled	Enable this rule.
	disabled	Disable this rule.
Defaults	N/A	
Command Modes	fw-l3	
Usage Guidelines	Enable or disable this rule. Refer to Create a New L3 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l3" mode.	
Examples	moxa (fw-l3)# status enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Priority of the L3 Policy Rule

Commands

priority <priority (1 - 64)>

Syntax Description	priority	Configure the priority of this rule.
	<priority>	Specify the priority of the rule (1-64).
Defaults	N/A	
Command Modes	fw-l3	
Usage Guidelines	Set the priority of this rule. Refer to Create a New L3 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l3" mode.	
Examples	moxa (fw-l3)# priority 5	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Action of the L3 Policy Rule

Commands

action {accept | drop}

Syntax Description	action	Configure the action of this rule.
	accept	Accept any packets that match this rule.
	drop	Drop any packets that match this rule.
Defaults	N/A	
Command Modes	fw-l3	
Usage Guidelines	Configure the action of this rule. Refer to Create a New L3 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l3" mode.	
Examples	moxa (fw-l3)# action drop	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Protocol of the L3 Policy Rule

Commands

protocol {all | icmp | tcp | udp}

Syntax Description	protocol	Configure the protocol(s) this rule will apply to.
	all	This rule applies to all IP frames.
	icmp	This rule applies to all ICMP frames.
	tcp	This rule applies to all TCP frames.
	udp	This rule applies to all UDP frames.
Defaults	N/A	
Command Modes	fw-l3	
Usage Guidelines	Refer to Create a New L3 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l3" mode.	
Examples	moxa (fw-l3)# protocol all	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Source IP of the L3 Policy Rule

Commands

src-ip <net-id> <netmask>

Syntax Description	src-ip	Configure the source network of this rule.
	<net-id>	Specify the IP address of the source network of this rule.
	<netmask>	Specify the subnet mask of the source network of this rule.
Defaults	N/A	
Command Modes	fw-l3	
Usage Guidelines	Refer to Create a New L3 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l3" mode.	
Examples	moxa (fw-l3)# src-ip 192.168.127.88 255.255.255.0	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Source Port Range of the L3 Policy Rule

Commands

src-port <port-start (0-65535)> [<port-end (0-65535)>]

Syntax Description	src-port	Configure the source TCP/UDP port range of this rule.
	<port-start>	Specify the starting port of the source port range (0-65535).
	<port-end>	Specify the ending port of the source port range (0-65535).
Defaults	N/A	
Command Modes	fw-l3	
Usage Guidelines	Refer to Create a New L3 Rule or Edit an Existing Rule With a Specific Priority for how to enter "fw-l3" mode.	
Examples	moxa (fw-l3)# src-port 50 80	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Destination IP of the L3 Policy Rule

Commands

dst-ip <net-id> <netmask>

Syntax Description	dst-ip	Configure the destination network of this rule.
	<net-id>	Specify the IP address of the destination network of this rule.
	<netmask>	Specify the subnet mask of the destination network of this rule.
Defaults	N/A	
Command Modes	fw-l3	
Usage Guidelines	N/A	
Examples	moxa (fw-l3)# dst-ip 192.168.127.253 255.255.255.0	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the Destination Port Range of the L3 Policy Rule

Commands

dst-port <port-start (0-65535)> [<port-end (0-65535)>]

Syntax Description	dst-port	Configure the destination TCP/UDP port range of this rule.
	<port-start>	Specify the starting port of the source port range (0-65535).
	<port-end>	Specify the ending port of the source port range (0-65535).
Defaults	N/A	
Command Modes	fw-l3	
Usage Guidelines	N/A	
Examples	moxa (fw-l3)# dst-port 50 80	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Delete a Specific or All L3 Policies Rules

Commands

no firewall l3-policy {all | <priority (1-64)>}

Syntax Description	no	Delete configuration
	firewall	Configure firewall settings.
	l3-firewall	Configure Layer 3 firewall policy settings.
	all	Delete all Layer 3 firewall policy rules.
	priority	Delete the Layer 3 firewall policy rule with the specified priority (1-64).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Delete Layer 3 firewall policy rules.	
Examples	moxa (config)# no firewall l3-policy all moxa (config)# no firewall l3-policy 3	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Security

Device Security

Show the Security Status

Commands

show security {feature group}

Syntax Description	show	Show the current settings and device status.
	security	Show the status of the specified security feature, sorted by security risk level from Highest to Lowest. If no feature group is specified, the status of all security features will be shown.
	feature group	Optional parameter. Specify a feature to show the status for.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# show security moxa# show security event-log-notification	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring	

Configure Layer 2 Trusted Access

Commands

trusted-access l2-policy {enabled | disabled}

Syntax Description	trusted-access	Configure Trusted Access settings.
	l2-policy	Configure Layer 2 Trusted Access policy settings.
	enabled	Enable L2 Trusted Access.
	disabled	Disable L2 Trusted Access.
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa(config)# trusted-access l2-policy enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Reset Layer 2 Trusted Access Policy Settings

Commands

no trusted-access l2-policy

Syntax Description	no	Reset or clear settings.
	trusted-access	Reset Trusted Access settings.
	l2-policy	Reset Layer 2 Trusted Access policy settings.
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config)# no trusted-access l2-policy	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Create a Layer 2 Trusted Access Entry

Commands

entry new <mac-address> {enabled | disabled}

Syntax Description	entry	Configure Layer 2 Trusted Access entries.
	new	Create a new entry without specifying an index.
	<mac-address>	Specify the MAC address of the new entry (e.g., 00:12:34:56:78:9A).
	enabled	Enable the L2 Trusted Access entry.
	disabled	Disable the L2 Trusted Access entry.
Defaults	N/A	
Command Modes	trusted-access-l2	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (trusted-access-l2)# entry new <mac-address> enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Create a Layer 2 Trusted Access Entry by Index

Commands

entry idx <index (1-20)> <mac-address> {enabled | disabled}

Syntax Description	entry	Configure Layer 2 Trusted Access entries.
	idx	Create a new entry with a specific index.
	<index>	Specify the index of the entry (1 to 20).
	<mac-address>	Specify the MAC address of the new entry (e.g., 00:12:34:56:78:9A).
	enabled	Enable the L2 Trusted Access entry.
	disabled	Disable the L2 Trusted Access entry.
Defaults	N/A	
Command Modes	trusted-access-l2	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (trusted-access-l2)# entry idx index 1 <mac-address> enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Delete a Layer 2 Trusted Access Entry

Commands

no entry <index (1-20)>

Syntax Description	no	Reset or clear settings.
	entry	Delete a Layer 2 Trusted Access entry.
	<index>	Specify the index of the entry to delete (1 to 20).
Defaults	N/A	
Command Modes	trusted-access-l2	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (trusted-access-l2)# no entry index 1	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Show Layer 2 Trusted Access Settings

Commands

show

Syntax Description	show	Show the Layer 2 Trusted Access settings.
Defaults	N/A	
Command Modes	trusted-access-l2	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (trusted-access-l2)# show	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure Layer 3 Trusted Access

Commands

trusted-access l3-policy {enabled | disabled}

Syntax Description	trusted-access	Configure Trusted Access settings.
	L3-policy	Configure Layer 3 Trusted Access policy settings.
	enabled	Enable L3 Trusted Access.
	disabled	Disable L3 Trusted Access.
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa(config)# trusted-access l3-policy enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Reset Layer 3 Trusted Access Policy Settings

Commands

no trusted-access l3-policy

Syntax Description	no	Reset or clear settings.
	trusted-access	Reset Trusted Access settings.
	L3-policy	Reset Layer 3 Trusted Access policy settings.
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config)# no trusted-access l3-policy	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Create a Layer 3 Trusted Access Entry

Commands

entry new <net-id (ipv4)> <netmask> {enabled | disabled}

Syntax Description	entry	Configure Layer 3 Trusted Access entries.
	new	Create a new entry without specifying an index.
	<net-id>	Specify the network ID of this entry (IPv4)
	<netmask>	Specify the subnet mask of this entry (e.g. 255.255.255.0).
	enabled	Enable the L3 Trusted Access entry.
disabled	Disable the L3 Trusted Access entry.	
Defaults	N/A	
Command Modes	trusted-access-l3	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (trusted-access-l3)# entry new 192.168.127.10 255.255.255.0 enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Create a Layer 3 Trusted Access Entry by Index

Commands

entry idx <index (1-20)> <net-id (ipv4)> <netmask> {enabled | disabled}

Syntax Description	entry	Configure Layer 3 Trusted Access entries.
	idx	Create a new entry with a specific index.
	<index>	Specify the index of the entry (1 to 20).
	<net-id>	Specify the network ID of this entry (IPv4)
	<netmask>	Specify the subnet mask of this entry (e.g. 255.255.255.0).
	enabled	Enable the L3 Trusted Access entry.
disabled	Disable the L3 Trusted Access entry.	
Defaults	N/A	
Command Modes	trusted-access-l3	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (trusted-access-l3)# entry idx index 1 192.168.127.10 255.255.255.0 enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Delete a Layer 3 Trusted Access Entry

Commands

no entry <index (1-20)>

Syntax Description	no	Reset or clear settings.
	entry	Delete a Layer 3 Trusted Access entry.
	<index>	Specify the index of the entry to delete (1 to 20).
Defaults	N/A	
Command Modes	trusted-access-l3	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (trusted-access-l3)# no entry index 1	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Show Layer 3 Trusted Access Settings

Commands

show

Syntax Description	show	Show the Layer 3 Trusted Access settings.
Defaults	N/A	
Command Modes	trusted-access-l3	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (trusted-access-l3)# show	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Show the Device Unique Key

Commands

show device-unique-key

Syntax Description	show	Show information for the specified parameter.
	device-unique-key	Show the device unique key information.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# show device-unique-key	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Renew the Device Unique Key

Commands

reload device-unique-key

Syntax Description	reload	Renew information for the specified parameter.
	device-unique-key	Renew the device unique key information.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later. This action will reboot the device.	
Examples	moxa# reload device-unique-key	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure Static Wi-Fi ACL Settings

Commands

wlan acl static {enabled | disabled} **mode** {accept | block}

Syntax Description	wlan	Configure WLAN settings.
	acl	Configure Wi-Fi Access Control List (ACL) settings.
	static	Configure Static ACL settings.
	enabled	Enable the Static ACL policy.
	disabled	Disable the Static ACL policy.
	mode	Configure the Wi-Fi ACL mode.
	accept	Set the ACL mode to Accept. Traffic matching the policy rules will be accepted.
	block	Set the ACL mode to Block. Traffic matching the policy rules will be blocked.
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config)# wlan acl static enabled mode block	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Reset Static Wi-Fi ACL Settings

Commands

no wlan acl static

Syntax Description	no	Reset or clear settings.
	wlan	Reset WLAN settings.
	acl	Reset Wi-Fi ACL settings.
	static	Reset Static Wi-Fi ACL settings.
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config)# no wlan acl static	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Create a new Static Wi-Fi ACL Entry

Commands

entry new <mac-addr> {enabled | disabled}

Syntax Description	entry	Configure Static Wi-Fi ACL entries.
	new	Create a new entry without specifying an index.
	<mac-address>	Specify the MAC address of the new entry (e.g., 00:12:34:56:78:9A).
	enabled	Enable the Wi-Fi ACL entry.
	disabled	Disable the Wi-Fi ACL entry.
Defaults	N/A	
Command Modes	config-wifi-acl-static	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config)# wlan acl static moxa (config-wifi-acl-static)# moxa (config-wifi-acl-static)# entry new <mac-addr> enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Create a new Static Wi-Fi ACL Entry by Index

Commands

entry idx <index (1-200)> <mac-addr> {enabled | disabled}

Syntax Description	entry	Configure Static Wi-Fi ACL entries.
	idx	Specify the index of the entry (1 to 200).
	<mac-address>	Specify the MAC address of the new entry (e.g., 00:12:34:56:78:9A).
	enabled	Enable the Wi-Fi ACL entry.
	disabled	Disable the Wi-Fi ACL entry.
Defaults	N/A	
Command Modes	config-wifi-acl-static	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config)# wlan acl static moxa (config-wifi-acl-static)# moxa (config-wifi-acl-static)# entry idx index 18 <mac-addr> enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Delete a Static Wi-Fi ACL Entry

Commands

no entry <index (1-200)>

Syntax Description	no	Reset or clear settings.
	entry	Delete a Static Wi-Fi ACL entry.
	<index>	Specify the index of the entry to delete (1 to 200).
Defaults	N/A	
Command Modes	config-wifi-acl-static	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config)# wlan acl static moxa (config-wifi-acl-static)# moxa (config-wifi-acl-static)# no entry idx index 18	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Show the Static Wi-Fi ACL

Commands

show

Syntax Description	show	Show the Static Wi-Fi ACL entries.
Defaults	N/A	
Command Modes	config-wifi-acl-static	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config)# wlan acl static moxa (config-wifi-acl-static)# moxa (config-wifi-acl-static)# show	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure Automatic Wi-Fi ACL Settings

Commands

wlan acl auto {enabled | disabled} **attempts** <retry-failure-threshold (1-10)>

Syntax Description	wlan	Configure WLAN settings.
	acl	Configure Wi-Fi Access Control List (ACL) settings.
	auto	Configure Automatic ACL settings.
	enabled	Enable the Automatic ACL policy.
	disabled	Disable the Automatic ACL policy.
	attempts	Configure the number of Wi-Fi authentication failure retry attempts. If exceeded, the connecting device will be added to the block list until unblocked by an authorized user, the device is rebooted, or the Wi-Fi interface is reset.
	<retry-failure-threshold>	Specify the number of Wi-Fi authentication failure retry attempts (1-10).
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config)# wlan acl auto enabled attempts retry-failure-threshold 4	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Show the Static and Automatic Wi-Fi ACL Configuration

Commands

show wlan acl config

Syntax Description	show	Show configuration settings.
	wlan	Show WLAN configuration settings.
	acl	Show Wi-Fi ACL settings.
	config	Show the Automatic and Static Wi-Fi ACL configuration settings.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	<pre>moxa# show wlan acl config [Automatic Wi-Fi ACL] Status : enabled Retry Failure Threshold : 4 [Static Wi-Fi ACL] ...</pre>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Show the Status of Wi-Fi ACL Entries

Commands

show wlan acl

Syntax Description	show	Show configuration settings.
	wlan	Show WLAN configuration settings.
	acl	Show the status of Wi-Fi ACL entries.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	<pre>moxa# show wlan acl Idx MAC Address Status Type ----- 1 00:90:E8:11:22:33 accepted static 2 00:90:E8:11:22:44 blocked automatic & static 3 00:90:E8:11:22:55 blocked manual & static</pre>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Block or Unblock Devices in the Wi-Fi ACL

Commands

wlan acl {block | unblock} <mac-addr>

Syntax Description	wlan	Configure WLAN settings.
	acl	Configure Wi-Fi Access Control List (ACL) settings.
	block	Block the specified device.
	unblock	Unblock the specified device.
	<mac-addr>	Specify the MAC address of the device.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# wlan acl unblock 00:90:e8:11:22:33 Are you sure you want to unblock this client? [y/N]	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Configure Client Isolation Settings by SSID Index

Commands

client-isolation ssid-idx <ssid-index (1-9)>

Syntax Description	client-isolation	Configure Client Isolation settings.
	ssid-idx	Configure Client Isolation settings by SSID index.
	<ssid-index>	Specify the SSID index (1-9).
Defaults	N/A	
Command Modes	Configuration	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config)# client-isolation ssid-idx 1 moxa (config-cliiso)#	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Configure the Client Isolation Mode

Commands

mode {disabled | same-ssid | same-subnet}

Syntax Description	mode	Configure Client Isolation mode.
	disabled	Disable Client Isolation.
	same-ssid	Isolate clients connected to the same SSID.
	same-subnet	Isolate clients within the same subnet.
Defaults	N/A	
Command Modes	config-cliiso	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config-cliiso)# mode same-subnet	
Error Messages	N/A	
Related Commands	moxa (config-cliiso)# subnet-type {static dhcp} moxa (config-cliiso)# iso-subnet <gateway> <netmask> moxa (config-cliiso)# no mode moxa (config-cliiso)# no subnet-type moxa (config-cliiso)# no iso-subnet moxa (config-cliiso)# iso-subnet <gateway> <netmask>	
Privilege Required	Network	

Configure Allowed Subnets for Client Isolation

Commands

allowed-subnet {new | <subnet-index (1-8)>}

Syntax Description	allowed-subnet	Configure the allowed subnets for Client Isolation.
	new	Create a new allowed subnet entry.
	<subnet-index>	Specify the subnet index (1-9).
Defaults	N/A	
Command Modes	config-cliiso	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa (config-cliiso)# allowed-subnet 1 moxa (cliiso-allow)#	
Error Messages	N/A	
Related Commands	moxa (cliiso-allow)# status {enabled disabled} moxa (cliiso-allow)# subnet <ip-domain-name (max len: 63)> <netmask> moxa (cliiso-allow)# protocol {all icmp tcp udp} moxa (cliiso-allow)# port <port-start (0-65535)> <port-end (0-65535)> moxa (cliiso-allow)# exit moxa (config-cliiso)# no allowed-subnet {all <subnet-index (1-8)>}	
Privilege Required	Network	

Show the Client Isolation Configuration

Commands

show client-isolation config

Syntax Description	show	Show configuration settings.
	client-isolation	Show Client Isolation information.
	config	Show the Client Isolation settings.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# show client-isolation config [Index: 1] SSID : RF Band : 5ghz Client Isolation : disabled Subnet Type : static Static Netmask : 255.255.255.0 Static Gateway : 192.168.127.1 Allowed Subnets Idx Status Subnet Proto. Port ----- 1 enabled 192.168.127.200/32 all 123 - 456 2 disabled 192.168.127.100/32 tcp 123 - 456 3 disabled all 0 - 0 4 disabled all 0 - 0 5 disabled all 0 - 0 6 disabled all 0 - 0 7 disabled all 0 - 0 8 disabled all 0 - 0 [Index: 2] ...	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network	

Device Certificates

Show Certificates

Commands

show cert-mgmt

Syntax Description	show	Show the current settings and device status.
	cert-mgmt	Show all certificates under the certification management feature.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# show cert-mgmt	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring/System Backup/Diagnostics/Advanced Diagnostic/Network	

Generate or Upload the Device Certificate for HTTPS

Commands

cert-mgmt cert https {generate | <source>}

Syntax Description	cert-mgmt	Manage certificates.
	cert	Generate or upload device certificates.
	https	Generate or upload a device certificate for HTTPS.
	generate	Generate a certificate locally through the AWK device.
	<source>	Specify the file source to upload a certificate from.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt cert https generate moxa# cert-mgmt cert https sftp://user:password@192.168.127.28/http-cert.crt moxa# cert-mgmt cert https sftp://user:password@192.168.127.28/folder-1/cert.pem folder-2/key.key	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Export the Device Certificate for HTTPS

Commands

cert-mgmt csr https <storage-location>

Syntax Description	cert-mgmt	Manage certificates.
	csr	Export the certificate signing request.
	https	Export the device certificate for HTTPS.
	<storage-location>	Specify the storage location for the exported file.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt csr https sftp://<account>:<password>@<server>/<filename>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Generate or Upload the Device Certificate for Syslog

Commands

cert-mgmt cert syslog <server-id (1-3)> {generate | <source>}

Syntax Description	cert-mgmt	Manage certificates.
	cert	Generate or upload device certificates.
	syslog	Generate or upload a device certificate for Syslog.
	<server id (1-3)>	Specify the index of the Syslog server (1 to 3).
	generate	Generate a certificate locally through the AWK device.
	<source>	Specify the file source to upload a certificate from.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt cert syslog server-id 1 sftp://user:password@192.168.127.28/syslog-cert.crt	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor System	

Export the Device Certificate for Syslog

Commands

cert-mgmt csr syslog <storage-location>

Syntax Description	cert-mgmt	Manage certificates.
	csr	Export the certificate signing request.
	syslog	Export the device certificate for Syslog.
	<server id (1-3)>	Specify the index of the Syslog server (1 to 3).
	<storage-location>	Specify the storage location for the exported file.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt csr syslog <server-id (1-3)> sftp://<account>:<password>@<server>/<filename>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Upload the CA Certificate for Syslog

Commands

cert-mgmt ca-cert syslog <server-id (1-3)> <source>

Syntax Description	cert-mgmt	Manage certificates.
	ca-cert	Generate or upload device certificates.
	syslog	Upload the server CA certificate for Syslog.
	<server id (1-3)>	Specify the index of the Syslog server (1 to 3).
	<source>	Specify the file source to upload a certificate from.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt ca-cert syslog <server-id (1-3)> sftp://<account>:<password>@<server>/<filename>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor System	

Remove the CA Certificate for Syslog

Commands

no cert-mgmt ca-cert syslog <server-id (1-3)>

Syntax Description	no	Remove or reset settings.
	cert-mgmt	Manage certificates.
	ca-cert	Remove a CA certificate.
	syslog	Remove the CA certificate for Syslog.
	<server id (1-3)>	Specify the index of the Syslog server (1 to 3).
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# no cert-mgmt ca-cert syslog <server-id (1-3)>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor System	

Upload the CA Certificate for Email Notifications

Commands

cert-mgmt ca-cert email-notification <source>

Syntax Description	cert-mgmt	Manage certificates.
	ca-cert	Generate or upload device certificates.
	syslog	Upload the server CA certificate for Email Notifications.
	<source>	Specify the file source to upload a certificate from.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt ca-cert email-notification sftp://<account>:<password>@<server>/<filename>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor System	

Remove the CA Certificate for Email Notifications

Commands

no cert-mgmt ca-cert email-notification

Syntax Description	no	Remove or reset settings.
	cert-mgmt	Manage certificates.
	ca-cert	Remove a CA certificate.
	email-notification	Remove the CA certificate for Email Notifications.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# no cert-mgmt ca-cert email-notification	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor System	

Upload the CA Certificate for Device Data

Commands

cert-mgmt ca-cert device-data <source>

Syntax Description	cert-mgmt	Manage certificates.
	ca-cert	Generate or upload device certificates.
	device-data	Upload the server CA certificate for functions related to device data, including configuration restore.
	<source>	Specify the file source to upload a certificate from.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt ca-cert device-data sftp://<account>:<password>@<server>/<filename>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Backup	

Remove the CA Certificate for Device Data

Commands

no cert-mgmt ca-cert device-data

Syntax Description	no	Remove or reset settings.
	cert-mgmt	Manage certificates.
	ca-cert	Remove a CA certificate.
	device-data	Remove the CA certificate for device data.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# no cert-mgmt ca-cert device-data	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Backup	

Upload the CA Certificate for Wi-Fi WPA TLS

Commands

cert-mgmt ca-cert wlan-wpa <source>

Syntax Description	cert-mgmt	Manage certificates.
	ca-cert	Generate or upload device certificates.
	wlan-wpa	Upload the server CA certificate for Wi-Fi WPA TLS.
	<source>	Specify the file source to upload a certificate from.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt ca-cert wlan-wpa sftp://<account>:<password>@<server>/<filename>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Remove the CA Certificate for Wi-Fi WPA TLS

Commands

no cert-mgmt ca-cert wlan-wpa

Syntax Description	no	Remove or reset settings.
	cert-mgmt	Manage certificates.
	ca-cert	Remove a CA certificate.
	wlan-wpa	Remove the CA certificate for Wi-Fi WPA TLS.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# no cert-mgmt ca-cert wlan-wpa	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Generate or Upload the Device Certificate for Device Data Transfer

Commands

cert-mgmt cert data-transfer {generate | <source>}

Syntax Description	cert-mgmt	Manage certificates.
	cert	Generate or upload device certificates.
	data-transfer	Generate or upload a device certificate for data-transferring functions including Configuration Backup, One Key Information, Data Collection, Event Log Backup, Diagnostic Support, Wi-Fi Mirroring Results, and Ping Results.
	generate	Generate a certificate locally through the AWK device.
	<source>	Specify the file source to upload a certificate from.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt cert data-transfer sftp://<account>:<password>@<server>/<certificate filename> [<key filename>] moxa# cert-mgmt cert data-transfer generate	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring/System Backup/Diagnostics/Advanced Diagnostic	

Export the Device Certificate for Device Data Transfer.

Commands

cert-mgmt csr data-transfer <storage-location>

Syntax Description	cert-mgmt	Manage certificates.
	csr	Export the certificate signing request.
	data-transfer	Export the device certificate for device data transfer.
	<storage-location>	Specify the storage location for the exported file.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt csr data-transfer sftp://<account>:<password>@<server>/<filename>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring/System Backup/Diagnostics/Advanced Diagnostic	

Generate or Upload the Device Certificate for Wi-Fi WPA TLS

Commands

cert-mgmt cert wlan-wpa {generate | <source>}

Syntax Description	cert-mgmt	Manage certificates.
	cert	Generate or upload device certificates.
	wlan-wpa	Generate or upload a device certificate for Wi-Fi WPA TLS.
	generate	Generate a certificate locally through the AWK device.
	<source>	Specify the file source to upload a certificate from.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	cert-mgmt cert wlan-wpa sftp://<account>:<password>@<server>/<certificate filename> [<key filename>]	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Export the Device Certificate for Wi-Fi WPA TLS

Commands

cert-mgmt csr wlan-wpa <storage-location>

Syntax Description	cert-mgmt	Manage certificates.
	csr	Export the certificate signing request.
	wlan-wpa	Export the device certificate for Wi-Fi WPA TLS.
	<storage-location>	Specify the storage location for the exported file.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt csr wlan-wpa sftp://<account>:<password>@<server>/<filename>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Generate or Upload the Device Certificate for Wi-Fi Sniffer and Wi-Fi Mirroring

Commands

cert-mgmt cert wlan-sniffer-mirror {generate | <source>}

Syntax Description	cert-mgmt	Manage certificates.
	cert	Generate or upload device certificates.
	wlan-sniffer-mirror	Generate or upload a device certificate for Wi-Fi Sniffer and Wi-Fi Mirroring.
	generate	Generate a certificate locally through the AWK device.
	<source>	Specify the file source to upload a certificate from.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt cert wlan-sniffer-mirror sftp://<account>:<password>@<server>/<certificate filename> [<key filename>]	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostic/Network Configuration	

Export the Device Certificate for Wi-Fi Sniffer and Wi-Fi Mirroring

Commands

cert-mgmt csr wlan-sniffer-mirror <storage-location>

Syntax Description	cert-mgmt	Manage certificates.
	csr	Export the certificate signing request.
	wlan-sniffer-mirror	Export the device certificate for Wi-Fi Sniffer and Wi-Fi Mirroring.
	<storage-location>	Specify the storage location for the exported file.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Firmware v2.0 and later.	
Examples	moxa# cert-mgmt csr wlan-sniffer-mirror sftp://<account>:<password>@<server>/<filename>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostic/Network Configuration	

Diagnostics

SNMP

Configure the SNMP Server Version

Commands

user-iface snmp version {v1-v2c-v3 | v1-v2c | v3}

Syntax Description	user-iface	Configure user interface settings.
	snmp	Configure SNMP settings.
	version	Configure the SNMP server version.
	v1-v2c-v3	Set the SNMP server version to v1-v2c-v3 mixed.
	v1-v2c	Set the SNMP server version to v1-v2c mixed.
	v3	Set the SNMP server version to v3 only.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# user-iface snmp version v1-v2c	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the SNMP Read-only Community

Commands

user-iface snmp community read-only <read-community (max len: 31)>

Syntax Description	user-iface	Configure user interface settings.
	snmp	Configure SNMP settings.
	community	Configure the SNMP community.
	read-only	Configure the SNMP read-only community.
	<read-community>	Specify the SNMP read-only community (max. 31 characters).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# user-iface snmp community read-only NMS	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Configure the SNMP Read-Write Community

Commands

user-iface snmp community read-write <read-write-community (max len: 31)>

Syntax Description	user-iface	Configure user interface settings.
	snmp	Configure SNMP settings.
	community	Configure the SNMP community.
	read-write	Configure the SNMP read-write community.
	<read-write-community>	Specify the SNMP read-write community (max. 31 characters).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	moxa (config)# user-iface snmp community read-write NMSadmin	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Network Status

LDDP

Enable/Disable LLDP

Commands

lldp {enabled | disabled}

Syntax Description	lldp	Configure LLDP settings.
	enable	Enable LLDP.
	disable	Disable LLDP.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# lldp enabled	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Configure the LLDP Transmission Interval

Commands

lldp transmit-interval <interval (5-32768 sec)>

Syntax Description	lldp	Configure LLDP settings.
	transmit-interval	Configure the LLDP transmission interval.
	<interval>	Specify the transmission interval (5-32768 sec).
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# lldp transmit-interval 1000	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Reset LLDP Settings

Commands

no lldp

Syntax Description	no	Reset settings to their default values.
	lldp	Reset LLDP settings.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# no lldp	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the LLDP Settings

Commands

show lldp config

Syntax Description	show	Show the current settings and device status.
	lldp	Show the LLDP configuration and status.
	config	Show the LLDP configuration.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show lldp config	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Network Configuration	

Show the List of Discovered Neighbor Devices

Commands

show lldp neighbors

Syntax Description	show	Show the current settings and device status.
	lldp	Show the LLDP configuration and status.
	neighbors	Show the list of discovered neighbor devices.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show lldp neighbors	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring	

Bridge Table

Commands

show net bridge

Syntax Description	show	Show the current settings and device status.
	net	Show network-related status information.
	bridge	Show the bridge table.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show net bridge	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Status Monitoring	

ARP Table

Show the ARP Table

Commands

show net arp

Syntax Description	show	Show the current settings and device status.
	net	Show network-related status information.
	arp	Show the ARP table.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show net arp	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Account System Auditor System Advanced Diagnostics Diagnostics Network Configuration Status Monitoring System Backup System Management	

Event Logs and Notifications

Enable Event Logs for Specific or All Event Groups

Commands

logging group {all | wi-fi | network | system | account | config | pwr} [**action** [local] [syslog]]

Syntax Description	logging	Configure event log settings.
	group	Enable event logs for event groups.
	all	Enable event logs for all event groups.
	wi-fi	Enable Wi-Fi event logs.
	network	Enable network event logs.
	system	Enable system event logs.
	account	Enable account event logs.
	config	Enable configuration event logs.
	pwr	Enable power event logs.
	action	Configure the event log action.
	local	Record the event logs locally.
	syslog	Send the event logs to the syslog server.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# logging group all action local	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor Systems	

Disable Event Logs for Specific or All Event Groups

Commands

no logging group {all | wi-fi | network | system | account | config | pwr } [**action** [local] [syslog]]

Syntax Description	no	Reset settings to their default values.
	logging	Reset event log settings.
	group	Disable event logs for event groups.
	all	Disable event logs for all event groups.
	wi-fi	Disable Wi-Fi event logs.
	network	Disable network event logs.
	system	Disable system event logs.
	account	Disable account event logs.
	config	Disable configuration event logs.
	pwr	Disable power event logs.
	action	Disable the event log action.
	local	Do not record event logs locally.
syslog	Do not send the event logs to the syslog server.	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	N/A	
Examples	(config)# no logging group all action local	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor Systems	

Show the Event Log Group Settings

Commands

show logging group

Syntax Description	show	Show the current settings and device status.
	logging	Show recorded event logs or event log settings.
	group	Show the settings for each event log group.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show logging group	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor Systems	

Configure System Event Notifications and Actions

Commands

event-notification system-event {all | event-name} [action [trap] [email] [relay]]

Syntax Description	event-notification	Configure event notification settings.
	system-event	Configure system event notification settings.
	all	Enable notifications for all system events.
	event-name	Specify the type of event notification to enable.
	action	Configure the event notification action.
	trap	Enable event notifications through SNMP Traps.
	email	Enable event notifications through email.
relay	Enable event notifications through the relay.	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	<p>Event names and description:</p> <p>cold-start: The system was cold started.</p> <p>warm-start: The system warm started.</p> <p>config-changed: The system configuration was changed.</p> <p>reaching-log-capacity: The log capacity has been reached.</p> <p>cleared-event-logs: The logs have been cleared.</p> <p>auth-failure: A user failed to log in.</p> <p>pwr1-turned-on: Power 1 was turned on.</p> <p>pwr1-turned-off: Power 1 was turned off.</p> <p>pwr2-turned-on: Power 2 was turned on.</p> <p>pwr2-turned-off: Power 2 was turned off.</p> <p>poe-received: Receiving PoE power.</p> <p>poe-not-received: Not Receiving PoE power.</p> <p>di1-triggered: DI 1 was triggered.</p> <p>di1-disabled: DI 1 was disabled.</p> <p>di2-triggered: DI 2 was triggered.</p> <p>di2-disabled: DI 2 was disabled.</p>	
Examples	<pre>(config)# event-notification system-event warm-start action trap</pre> <pre>(config)# event-notification system-event all action trap email</pre>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor Systems	

Configure Wi-Fi Event Notifications and Actions

Commands

event-notification wifi-event {all | event-name} [**action** [trap] [email] [relay]]

Syntax Description	event-notification	Configure event notification settings.
	wifi-event	Configure Wi-Fi event notification settings.
	all	Enable notifications for all Wi-Fi events.
	event-name	Specify the type of event notification to enable.
	action	Configure the event notification action.
	trap	Enable event notifications through SNMP Traps.
	email	Enable event notifications through email.
relay	Enable event notifications through the relay.	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Event names and description: client-joined: A client has joined the network. client-left: A client has left the network.	
Examples	(config)# event-notification wifi-event all action email (config)# event-notification wifi-event client-joined action email	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor Systems	

Configure Network Event Notifications and Actions

Commands

event-notification network-event {all | event-name} [**action** [trap] [email] [relay]]

Syntax Description	event-notification	Configure event notification settings.
	network-event	Configure network event notification settings.
	all	Enable notifications for all network events.
	event-name	Specify the type of event notification to enable.
	action	Configure the event notification action.
	trap	Enable event notifications through SNMP Traps.
	email	Enable event notifications through email.
relay	Enable event notifications through the relay.	
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Event names and description: lan1-link: A link is established on LAN 1. no-lan1-link: The link on LAN 1 was disconnected. lan2-link: A link is established on LAN 2. no-lan2-link: The link on LAN 2 was disconnected.	
Examples	(config)# event-notification network-event all action email (config)# event-notification network-event no-lan1-link action trap	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor Systems	

Disable System Event Notifications and Actions

Commands

no event-notification system-event {all | event-name} [**action** [trap] [email] [relay]]

Syntax Description	no	Reset settings to their default values.
	event-notification	Disable event notifications.
	system-event	Disable system event notifications.
	all	Disable notifications for all events.
	event-name	Specify the type of event notifications to disable.
	action	Disable event notifications actions.
	trap	Disable event notifications through SNMP Traps.
	email	Disable event notifications through email.
	relay	Disable event notifications through the relay.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	<p>Event names and description:</p> <p>cold-start: The system was cold started.</p> <p>warm-start: The system warm started.</p> <p>config-changed: The system configuration was changed.</p> <p>reaching-log-capacity: The log capacity has been reached.</p> <p>cleared-event-logs: The logs have been cleared.</p> <p>auth-failure: A user failed to log in.</p> <p>pwr1-turned-on: Power 1 was turned on.</p> <p>pwr1-turned-off: Power 1 was turned off.</p> <p>pwr2-turned-on: Power 2 was turned on.</p> <p>pwr2-turned-off: Power 2 was turned off.</p> <p>poe-received: Receiving PoE power.</p> <p>poe-not-received: Not Receiving PoE power.</p> <p>di1-triggered: DI 1 was triggered.</p> <p>di1-disabled: DI 1 was disabled.</p> <p>di2-triggered: DI 2 was triggered.</p> <p>di2-disabled: DI 2 was disabled.</p>	
Examples	<pre>(config)# no event-notification system-event warm-start action trap (config)# no event-notification system-event all action trap email</pre>	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor Systems	

Disable Wi-Fi Event Notifications and Actions

Commands

no event-notification wifi-event {all | event-name} [**action** [trap] [email] [relay]]

Syntax Description	no	Reset settings to their default values.
	event-notification	Disable event notification settings.
	wifi-event	Disable Wi-Fi event notification settings.
	all	Disable notifications for all Wi-Fi events.
	event-name	Specify the type of event notification to disable.
	action	Disable event notifications actions.
	trap	Disable event notifications through SNMP Traps.
	email	Disable event notifications through email.
	relay	Disable event notifications through the relay.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Event names and description: client-joined: A client has joined the network. client-left: A client has left the network.	
Examples	(config)# no event-notification wifi-event all action email (config)# no event-notification wifi-event client-joined action email	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor Systems	

Disable Network Event Notifications and Actions

Commands

no event-notification network-event {all | event-name} [**action** [trap] [email] [relay]]

Syntax Description	no	Reset settings to their default values.
	event-notification	Disable event notification settings.
	network-event	Disable network event notification settings.
	all	Disable notifications for all network events.
	event-name	Specify the type of event notification to disable.
	action	Disable event notifications actions.
	trap	Disable event notifications through SNMP Traps.
	email	Disable event notifications through email.
	relay	Disable event notifications through the relay.
Defaults	N/A	
Command Modes	Config	
Usage Guidelines	Event names and description: lan1-link: A link is established on LAN 1. no-lan1-link: The link on LAN 1 was disconnected. lan2-link: A link is established on LAN 2. no-lan2-link: The link on LAN 2 was disconnected.	
Examples	(config)# no event-notification network-event all action email (config)# no event-notification network-event no-lan1-link action trap	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor Systems	

Show Event Notification Settings

Commands

show event-notification {all | system-event | wifi-event | network-event}

Syntax Description	show	Show the current settings and device status.
	event-notification	Show the event notification settings.
	all	Show the notification settings for all events.
	system-event	Show the notification settings for system events.
	wifi-event	Show the notification settings for Wi-Fi events.
	network-event	Show the notification settings for network events.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# show event-notification all moxa# show event-notification system-event	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Auditor Systems	

Tools

System Data Collection

Create a Snapshot of the System Configuration and Status

Commands

diag one-key <storage-location>

Syntax Description	diag	Perform system diagnostics.
	one-key	Create a snapshot of the system configuration and status.
	<storage-location>	Specify the storage location.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	storage-location: {tftp://<server> sftp ://<account>:<password>@<server>/<folder> abc-02}	
Examples	moxa# diag one-key tftp://192.87.87.87	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Configure Data Collection Settings

Commands

diag data-collect data [wifi-statistic] [wifi-conn] [wifi-txrx] [network] [service] [system]

Syntax Description	diag	Perform system diagnostics.
	data-collect	Configure data collection settings.
	data	Configure which data is collected.
	[wifi-statistic]	Collect Wi-Fi statistics.
	[wifi-conn]	Collect Wi-Fi connection information.
	[wifi-txrx]	Collect Wi-Fi data transmission and reception information.
	[network]	Collect network status information.
	[service]	Collect device service status information.
[system]	Collect system status information.	
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# diag data-collect data wifi-statistic system	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Configure the Data Collection Interval and Stopping Time

Commands

diag data-collect interval <interval (1-30 sec)> **stop** <end-time (hh:mm:ss)> <end-month (1-12)> <end-date (1-31)> <end-year (2000-2037)>

Syntax Description	diag	Perform system diagnostics.
	data-collect	Configure data collection settings.
	interval	Configure data collection interval settings.
	<interval>	Specify the collection interval (1-30 sec).
	Stop	Specify the data collection stopping time.
	<end-time>	Specify the stop time (hh:mm:ss, e.g., 01:02:03).
	<end-month>	Specify the ending month (1-12).
	<end-date>	Specify the ending date (1-31).
<end-year>	Specify the ending year (2000-2037).	
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# diag data-collect interval 25 stop 01:02:03 1 30 2023	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Start Data Collection

Commands

diag data-collect start <storage-location>

Syntax Description	diag	Perform system diagnostics.
	data-collect	Configure data collection settings.
	start	Start data collection.
	<storage-location>	Specify the storage location.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Storage location: {tftp://<server> sftp ://<account>:<password>@<server>/<folder> abc-02}	
Examples	moxa# diag data-collect start abc-02	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Stop Data Collection

Commands

diag data-collect stop

Syntax Description	diag	Perform system diagnostics.
	data-collect	Configure data collection settings.
	stop	Stop data collection.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# diag data-collect stop	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

View the Data Collection Result

Commands

diag data-collect list

Syntax Description	diag	Perform system diagnostics.
	data-collect	Configure data collection settings.
	list	Show the data collection results.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# diag data-collect list	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Upload the Data Collected Result

Commands

diag data-collect upload <storage-location>

Syntax Description	diag	Perform system diagnostics.
	data-collect	Configure data collection settings.
	upload	Upload the data collection results.
	<storage-location>	Specify the storage location.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Storage location: {tftp://<server> sftp ://<account>:<password>@<server>/<folder> abc-02}	
Examples	moxa# diag data-collect upload tftp://192.168.127.84	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Channel Scan

Perform a Channel Analysis

Commands

diag wlan channel-analyze

Syntax Description	diag	Perform system diagnostics.
	wlan	Perform a Wi-Fi action.
	channel-analyze	Perform a channel analysis.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# diag wlan channel-analyze Wi-Fi performance will be affected during the channel analysis. Are you sure you want to continue? [Y/N] Y	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Advanced Diagnostics	

Ping

Ping the Target Host

Commands

ping <host> **round** <round (3-86400)> | **stop** <end-time (hh:mm:ss)> <end-month (1-12)> <end-date (1-31)> <end-year (2000-2037)> [**interval** <interval (1-30 sec)>]

Syntax Description	ping	Ping target host.
	<host>	Specify the target host to ping (IPv4 Address/Host).
	round	Stop ping after a specified number of rounds.
	<round>	Specify the number of ping rounds (3-86400).
	stop	Stop ping after a specified period of time.
	<end-time>	Specify the stop time (hh:mm:ss, e.g., 01:02:03).
	<end-month>	Specify the ending month (1-12).
	<end-date>	Specify the ending date (1-31).
	<end-year>	Specify the ending year (2000-2037).
interval		Configure the ping interval. The default interval is 1 sec.
	<interval>	Specify the ping interval (1-30 sec).
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# ping 192.168.127.10 round 3 moxa# ping 192.168.127.10 stop 01:02:03 1 1 2004 interval 5	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Stop Pinging

Commands

ping stop

Syntax Description	ping	Ping the target host.
	stop	Stop ping the target host.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# ping stop	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Show the Ping Result

Commands

ping result [<storage-location>]

Syntax Description	ping	Ping the target host.
	result	Retrieve the ping result.
	<storage-location>	Specify the storage location.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Storage location: [tftp://<server>/<filename> sftp ://<account>:<password>@<server>/<pathname>]	
Examples	moxa# ping result	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Show the Ping Status

Commands

ping state

Syntax Description	ping	Ping the target host.
	state	Show the ping status.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# ping state	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Wi-Fi Mirroring

Start the Wi-Fi Mirror Capture

Commands

diag wlan mirror {local <mirror-period (1-60 min)> | remote}

Syntax Description	diag	Perform system diagnostics.
	wlan	Perform a Wi-Fi action.
	mirror	Configure Wi-Fi mirroring settings.
	local	Set the Wi-Fi mirroring type to Local.
	<mirror-period>	Specify the mirroring period (1-60 min).
	remote	Set the Wi-Fi mirroring type to Remote.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# diag wlan mirror remote	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Stop the Wi-Fi Mirror Capture

Commands

diag wlan mirror stop

Syntax Description	diag	Perform system diagnostics.
	wlan	Perform a Wi-Fi action.
	mirror	Configure Wi-Fi mirroring settings.
	stop	Stop Wi-Fi mirroring.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# diag wlan mirror stop	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Upload the Mirroring Result to a SFTP/TFTP Server

Commands

diag wlan mirror result <storage-location>

Syntax Description	diag	Perform system diagnostics.
	wlan	Perform a Wi-Fi action.
	mirror	Configure Wi-Fi mirroring settings.
	result	Upload the mirroring results to an SFTP/TFTP server or delete the mirroring results.
	<storage-location>	Specify the storage location.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	Storage location: {tftp://<server> sftp ://<account>:<password>@<server>/<folder>}	
Examples	moxa# diag wlan mirror result tftp://192.168.127.84	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Delete the Wi-Fi Mirroring Result

Commands

diag wlan mirror result delete

Syntax Description	diag	Perform system diagnostics.
	wlan	Perform a Wi-Fi action.
	mirror	Configure Wi-Fi mirroring settings.
	result	Upload the mirroring results to an SFTP/TFTP server or delete the mirroring results.
	delete	Delete the mirroring results.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# diag wlan mirror result delete	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Maintenance and Tools

Locator

Activate the Device Locator

Commands

diag locator [<duration (1-3600 sec)>]

Syntax Description	diag	Perform system diagnostics.
	locator	Start or stop the device locator.
	<duration (1-3600 sec)>	Specify the duration the device locator will be active for (1-3600 sec).
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# diag locator moxa# diag locator 60	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Stop the Device Locator

Commands

diag locator stop

Syntax Description	diag	Perform system diagnostics.
	locator	Start or stop the device locator.
	stop	Deactivate the device locator.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# diag locator stop	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	Diagnostics	

Reboot

Perform a Warm Reboot

Commands

reload

Syntax Description	reload	Perform a warm restart.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# reload	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management	

Perform Reset to Factory Default

Commands

reload factory-default [keep log]

Syntax Description	reload	Perform a warm restart or reset to factory default settings.
	factory-default	Reset to factory default settings.
	keep log	Keep the system event logs when resetting to factory default settings.
Defaults	N/A	
Command Modes	Basic	
Usage Guidelines	N/A	
Examples	moxa# reload factory-default Are you sure you want to reset the device to factory default settings? [Y/N] y	
Error Messages	N/A	
Related Commands	N/A	
Privilege Required	System Management
