EDS-G4008 Series

8G-port full Gigabit managed Ethernet switches

Features and Benefits

- Turbo Ring and Turbo Chain (recovery time < 50 ms @ 250 switches), and RSTP/STP for network redundancy
- · Wide range of power input options for flexible deployment
- · Compact and flexible housing design to fit into confined spaces
- · Supports MXstudio for easy, visualized industrial network management
- IEC 62443-4-2 Security Level 2 certified

Certifications

Introduction

The EDS-G4008 Series is equipped with 8 Gigabit Ethernet ports, making it ideal for upgrading an existing network to Gigabit speed or building a new full Gigabit backbone. Gigabit transmission speed increases bandwidth for higher performance and transfers large amounts of triple-play services across a network quickly.

Redundant Ethernet technologies such as Turbo Ring, Turbo Chain, and RSTP/STP increase the reliability of your system and improve the availability of your network backbone. The EDS-G4008 Series is designed specifically for demanding applications such as video and process monitoring, ITS, and DCS systems, all of which can benefit from a scalable backbone construction.

IEC 62443-4-2 Security Level 2 Certified

EDS-(G)4000 Series models are IEC 62443-4-2 Security Level 2 certified (FR_Cyber10011/A2 | IECEE Certificates) helping our customers meet the compliance requirements of secure industrial network design.
