Introduction

The AWK-1165A Series is a range of versatile industrial wireless APs with an integrated 5-port Gigabit Ethernet switch, designed to simplify network deployments. They are ideal for connecting multiple wired devices such as PLC controllers and HMIs, at a single location, reducing wiring complexity and saving installation space. Leveraging Wi-Fi 6 OFDMA and spatial reuse technologies, these APs deliver robust and efficient communication, even in high-density environments.

The AWK-1165A Series' robust design with a wide -40 to 75°C operating temperature range ensures optimal reliability. For consistent connectivity, the built-in 2.4/5 GHz band-pass filter minimizes out-of-band interference, while antenna isolation protects against ESD and power surges.

Tailored Industrial Wireless Technology

- Auto Channel Selection automatically scans and selects the optimal operating channel based on real-time analysis to minimize interference and enhance wireless performance
- 802.11k/v/r Fast Roaming enables faster, more reliable Wi-Fi client roaming and improved third-party interoperability
