Introduction

The TWS-3010-SPE Series industrial two-wire Ethernet switch is designed to bring reliable Ethernet connectivity to the field.

With 10BASE-T1L technology and support for Power over Data Line (PoDL) Classes 10, 11, and 12, the switch extends Ethernet communication to field devices. It delivers both power and data over a single twisted pair at data rates up to 10 Mbps and distances up to 1 km, simplifying installation, lowering wiring costs, and enabling more flexible field deployment.

Diagnostic functions and port-mirroring make deployment and troubleshooting a breeze. Compact chassis and front-facing ports make installation and maintenance easy in tight control cabinets. Industrial Ethernet protocols, like PROFINET, allow for seamless integration with existing systems, and provide scalability for future digitalization and IIoT expansion.
